## BE THE CHANGE - FOR YOU AND PLANET BLUE

*Dear Friends,*

I have been working in the Water Dispenser (WD) world for about 25 years, giving my contribution to write the history of the sparkling water dispensers and Point of Use water treatment...

I know, that makes me "wise" but still a dreamer at heart and even more motivated today!

I have seen and lived all the evolutions of this specific sector, experiencing and participating in its fast and important growth especially in the last 10 years, and I am extremely excited to work on this project within BWT. If you are considering entering this world, I always say that only the surface has been scratched, and each of us need to understand and be conscious of BWT's mission for our precious water - Changing our individual LIFESTYLE and changing the WORLD for the better.

In other words, converting local tap water into best mineralized drinking water. Plus helping the environment by drastically reducing the consumption of plastics and massively cutting CO<sub>2</sub> emissions arising from the unnecessary transport of bottled water (no matter if shipments are for single use - recycled - or in glass bottles).

*FOR YOU... Mineralization makes the real difference*

BWT's vision to "Change the World - sip by sip", is thanks to the worldwide patented mineralization technology know how. That's the transformation of local tap water into mineralized, hygienically safe drinking water according to WHO standards. The state of the art filtration to reduce limescale, heavy metals or other taste disturbing substances is just the preparation phase. The real difference uses the patented BWT mineralization technology with solid filtration technology. That's BWT water enhancement "inspired by nature". Local, filtered tap water, enriched by valuable minerals such as magnesium, zinc or silicate deliver perfect taste and helps us to feel more balanced and resilient to stress.

*...and FOR PLANET BLUE*

Using BWT water dispensers, mineralization, filtration and reverse osmosis technologies allow people worldwide, wherever they are, to stop using single-use plastic bottles saving the time and energy consuming transport, storage and disposal of this unnecessary plastic waste.

Everybody can contribute to reducing microplastic in food and to limiting "swimming plastic islands" in the oceans. As long transports of bottled water are no longer necessary, there is a significant positive impact towards lower CO<sub>2</sub> emissions.

It's a journey and you are warmly welcomed to join us - BE THE CHANGE - together we will Change the World, sip by sip.

## FOR YOU AND PLANET BLUE.

*Thank you for joining us!*

*You, your family, your friends, partners and customers will love it!*

*Yours*

*Roberta Polese*

***We are dreaming of a world where everybody has access to safe and healthy drinking water. This mission drives us to develop worldwide leading technologies to make out of any locally available water - healthy, tasty, mineralized drinking water - without the need to produce and transport bottled water. A win-win solution for people and environment!***

Andreas Weißenbacher  
Founder & CEO BWT

# CHANGE THE WORLD –

# SIP BY SIP

## **WE CHANGE THE WORLD - SIP BY SIP**

*We dream of a world where everyone has access to clean drinking water.*

*Of a world in which we use local tap water and transform it into drinking water of the highest quality, enriched with magnesium, zinc or silicate. Where plastic waste from disposable bottles is a thing of the past and we value our precious resource, water.*

*We are dreaming of a world that becomes a little bit better, every day, sip by sip.*

*We would like you to join us and make this dream come true.*

*Let us work together to revolutionise the future water market. On average, each European citizen consumed 118 liters of bottled water in 2019, with Italy leading market for the consumption of bottled water with 200 liters of bottled water consumed per person. In Germany as the second largest consumer, 86.6% of the non-carbonated mineral water sold is imported\*.*

*These imports require unnecessary transport, cause CO<sub>2</sub> emissions and create tons of plastic waste. This is why we have a dedicated mission: to Change the World – sip by sip – by filtering local water and enriching it with valuable minerals and trace elements such as magnesium, zinc or silicate. Our innovative, patented technologies enable people around the world to enjoy fresh, great-tasting, mineralized water straight from the tap, thus eliminating unnecessary transport and the use of disposable plastic bottles.*

*As a business, you can make a valuable contribution and set a clear example for sustainability and a sensitive approach to the way we use our precious resource, water. Say NO to single-use plastic and help make our planet a little bit better – sip by sip.*

**LET'S SAY "NO"**

# TO SINGLE-USE PLASTIC BOTTLES

Our Planet Blue is awash with plastic waste: no wonder, as plastic is readily available, robust, temperature-resistant, unbreakable and can be moulded into any shape. Many disposable items are produced alongside reusable plastic items, especially single-use plastic bottles, which are thrown away after use. The volume of plastic waste has been growing worldwide for years and now threatens to suffocate our planet. Here are some facts:

# 420

**million tons of plastic are estimated to be produced worldwide every year.** By comparison, this figure was only 2,1 million tons in the 1950s.

Source: <https://www.umweltberatung.at/>  
As at: 19.09.2022

# 1,2

**million single-use plastic bottles are sold worldwide every minute.** These are transported around the globe, generating unnecessary CO<sub>2</sub> emissions.

Source: <https://www.nabu.de/>  
As at: 19.9.2022

# 14

**percent of the world's plastic waste is recycled.** The rest will remain on the planet for many hundreds of years.

Source: <https://wir-lieben-recycling.de/>  
As at: 19.09.2022

# 5

**trillion plastic parts, and still counting, are already floating in our oceans according to National Geographic.** This is a big problem, because it takes several hundred years for plastic to decompose.

Source: <https://education.nationalgeographic.org/>  
As at: 01.2.2023

# 1

**plastic bottle alone can break down into 10 million microplastic parts** – these are plastic particles 0,1–5 millimetres in size, which enter our body via the food chain. Research is inconclusive as to how this affects the body; but one thing is certain, it isn't healthy!

Source: <https://www.watson.ch/>  
As at: 19.09.2022

# 2.500

**1-litre plastic bottles can be saved with just one filter cartridge.**

Source: [bwt.com](https://www.bwt.com), filter cartridge, model MPC500

**The figures clearly show that urgent action is required NOW.**

# PROBLEM FOUND – PROBLEM SOLVED!

To make dreams come true you have to set clear goals and implement practical actions. Our own clear goal is encapsulated in our mission to “Change the World – sip by sip”. Because we love people and water, and we want our planet to remain a decent place to live for future generations.

Our aim is to inspire people all over the world and to show how easy it is for every individual to make a contribution to returning our Planet Plastic to a Planet Blue. This can be achieved if we simply give up single-use plastic bottles and enjoy local water directly from the tap or table water filter. Using our innovative, patented technologies, local tap water, regardless of its quality, is filtered and enriched with valuable minerals and trace elements such as magnesium, zinc or silicate. It is a win-win situation for both, people and the environment, as customers no longer need to transport and store single-use plastic bottles and we avoid unnecessary transportation, its associated CO<sub>2</sub> emission, and plastic waste.

Our concept is simple and sustainable and can be implemented at home, in restaurants, hotels, offices, schools and wherever people can come together, believing they can make a big difference with small, simple changes, sip by sip.

**THE BWT PINK DOT!  
WE WILL ELIMINATE  
SINGLE-USE  
PLASTIC BOTTLES**

# TASTY, LOCALLY-PRODUCED BEST MINERALIZED DRINKING WATER

A MUST FOR YOU AND OUR ENVIRONMENT

**.TASTY**

Important, physiologically valuable minerals and trace elements such as magnesium, zinc and silicate.

**.LOCAL**

No transport - no additional CO<sub>2</sub> emissions.

**.CLEVER**

Zero single-use plastic and glass bottles.

**.ECONOMIC**

Save money and protect the environment.

# FOR YOU AND PLANET BLUE.

## FOR YOU

Our brand signature "BWT – For You and Planet Blue" expresses our purpose to offer our customers and end consumers the best products, equipment, technologies, and services in all areas of water treatment to enhance the levels of safety, hygiene, and health in our daily contact with water.

## FOR PLANET BLUE

In respect of clean water and energy, BWT is ready to take responsibility and contribute to a sustainable future on our planet.

# WATER IS OUR MISSION.

"WATER IS THE ELIXIR OF LIFE ON OUR PLANET AND IT IS THE LIFE-BLOOD OF BWT. WATER IS OUR MISSION."

As BWT Group we have no influence on whether everyone has easy access to an adequate water supply. However, using our innovative, ecological and economic patented technologies, we are able to provide people worldwide healthy, safe and tasty mineralized drinking water.

All BWT AQA drink filters refine tap water in five filtration stages. During this process, particles, heavy metals (such as copper, lead and nickel), odor and other taste disturbing substances such as chlorine are reduced. If necessary, BWT can provide a high class reverse osmosis technology to arrange drinking water independent of any local water quality. Nonetheless, this best state-of-the-art filtration is just the preparation phase. The real difference makes the patented BWT mineralization technology, which transforms local tap water into a perfect mineralized drinking water taste experience – inspired by nature.

## FOR EVERY TASTE AND EVERY DAY

Refreshingly delicious and naturally sustainable – we add value to achieve the best water quality! Our mineralization technologies are designed to support your everyday life, lifestyle, and your personal challenges.

- MORE TASTE
- MORE LOCAL PRODUCTION
- MORE SUSTAINABILITY

## FIT AND ACTIVE THROUGHOUT THE DAY

### DID YOU KNOW THAT...

**MAGNESIUM IS A VALUABLE MINERAL AND IMPORTANT FOR THE TASTE OF COLD AND HOT DRINKS AND FOOD?**

Magnesium serves as an energy carrier in the human body; it helps prevent fatigue and can contribute to the body's ability to relax and combat stress. Magnesium also boosts the function of the muscle and nervous system.

## ZINC + MAGNESIUM

### DID YOU KNOW THAT...

#### ZINC IS AN ESSENTIAL TRACE ELEMENT?

As a cell-protecting antioxidant, zinc can prevent against infections and allergies. Zinc is present in, for example, hair, bones, skin, eyes and the liver, and is also involved in many processes in the human body as a component and activator of numerous enzymes. Our body cannot produce zinc by itself and can only store it to a limited extent, therefore it is particularly important to ensure we have a continuous supply in our diet.

## ALKALINE WATER

### DID YOU KNOW THAT...

#### ALKALINE WATER HAS A HIGHER PH VALUE?

Alkaline water has a higher pH value than normal drinking water, which is generally around 7. Alkaline water is alleged to have many positive, invigorating properties for the body and mind; among others it helps to balance over-acidification of the body and the acid-base balance.

## SILICATE + MAGNESIUM

### DID YOU KNOW THAT...

#### SILICATE IS THE SECOND MOST ABUNDANT TRACE ELEMENT ON EARTH?

Silicate is important for healthy skin, hair and nails. As is the case with zinc, the body itself cannot produce silicate, so we must ingest it through food and fluids. The daily requirement of silicate is approx. 20-50 mg.

# LEADERS ARE CHANGING THE WORLD - SIP BY SIP

Companies, restaurants, hotels or events: there is nothing to prevent locally treated water being made available at the workplace, restaurants, hotels or at events. BWT technologies supply perfect mineralized water at the touch of a button - hot or cold, ambient or sparkling.

## SALZBURG FESTIVALS ARE PLASTIC BOTTLE-FREE

We are delighted that we were able to eliminate plastic bottles from the Salzburg Festival - one of the world's most high-profile cultural institutions. It is an important milestone for us as we communicate our „Change the World - sip by sip“ mission from Salzburg to the rest of the world! We installed more than 50 water dispensers in various venues to supply local, mineralised water to up to 5,000 employees, 3,000 artists and approx. 270,000 guests from over 75 countries.

**DR. KRISTINA HAMMER**  
SBG. FESTIVAL PRESIDENT

*"We are thrilled to secure BWT as our latest main sponsor, which enables us to send a clear signal in terms of sustainability and to save thousands of unnecessary plastic bottles."*

**NORBERT NIEDERKOFLER**  
3-STAR MICHELIN CHEF  
AND TEXTBOOK AUTHOR

## ALPINN - PLASTIC BOTTLE-FREE AT 2.275 METRES ABOVE SEA LEVEL

Michelin-star chef Norbert Niederkofler, owns the Food Space & Restaurant AlpiNN at Kronplatz overlooking the South Tyrolean Alps and Dolomites, and has declared it a "BWT Bottle Free Zone". To help protect the environment, he operates entirely without bottled mineral water, thereby eliminating time-consuming and environmentally harmful deliveries of approx. 20.000 water bottles a year to the restaurant, at 2.275 metres above sea level. Pile of rubbish and its CO<sub>2</sub> footprint are shrinking and paving the way for a sustainable taste experience.

*"We are demonstrating our appreciation for local water and have converted to a "BWT Bottle Free Zone". We are in the fortunate position of being able to have direct access to this precious commodity and not only serve local specialties to our guests, but now do precisely the same with water thanks to BWT. We use local water, refine it and offer an enjoyable and sustainable drinking experience," says Niederkofler.*

*"Drinking water is not only the most important consumable but is also the definitive flavour-carrier for coffee and tea, for example. This is why we supply BWT water to our guests throughout the new resort and provide Pearl Water in the BWT Pool wellness area."*

**Peter Hettegger junior**  
Hotelier, Das Edekweiss,  
Grossarl, Salzburg

## ZURI ZANZIBAR

ZURI Zanzibar offers a unique zanzibari experience, combined with excellent BWT water in all areas of the resort. BWT developed a comprehensive water management system - from seawater desalination to pool & drinking water treatment to water recycling. This resort offers its guests as well as employees local, BWT mineralized water directly out of the tap and water dispensers.

# IS IT WORTH HAVING A WATER DISPENSER?

SPOILER ALERT: **YES IT IS BETTER TO HAVE IT!**

Nowadays many hotels, restaurants, cafés all over the world are switching from bottled water to water dispensers for many different reasons. By providing locally mineralized, tasty BWT drinking water, both chilled and sparkling, they can keep their customers and guests refreshed and hydrated with the additional benefit of reducing their carbon footprint. Besides improving the quality of the water they serve, they also lower annual costs and contribute to sustainability objectives, eliminate transport, reclaim valuable space, and elevate the customer experience. Comparing cost efficiency, bottled water is calculated by cost per litre, whereas a water dispenser causes cost per unit (rent or sale).

Therefore the more drinking water they use per year, the more significant the savings will be. For example, let's assume a restaurant/hotel uses 200 bottle of water per day, that makes about 73.000 bottles of water per year.

This volume of bottles will have to be transported, put in storage, then in refrigerators, and once empty the bottles will have to be returned or disposed. And if we consider the cost, the saving is inconceivable! BWT water dispensers, the conscious and smart choice!

**For You and Planet Blue**

**PIERRE GASLY**  
F1 RACER

"I am super excited for the upcoming season with BWT and Alpine! I think the use of water without plastic bottles is an amazing and important opportunity for all of us. So I am very excited about this new chapter and to 'Change the World - sip by sip' together with BWT."

**ESTEBAN OCON**  
F1 GRAND PRIX WINNER

"BWT gives us the opportunity to deal responsibly with the resource water and I think that's a great and simple way to do something good for our planet and for oneself."

Credit: BWT Pictures

**DOUWE DEDECKER**  
KART DRIVER

"My goal is to reach the top in motorsports and I am very happy to have BWT supporting to achieve my dream and at the same time to do something good for the planet."

**DAWID KUBACKI**  
SKI JUMPER

"Sustainability is pretty important for my kind of sport. If we don't change something in our way of living and to reduce CO2, we maybe will not have the opportunity to jump on snow in the future. So I am really happy to have BWT on my side to avoid CO2 emissions, with drinking locally treated water without bottling it and transporting it over long distances."

# OUR CHANGE FAMILY GETS BIGGER: TOGETHER WE MAKE THE DIFFERENCE

"A dream that you dream alone is only a dream. A dream you dream together is a reality."  
(Yoko Ono)

To achieve our dream of a world without disposable plastic bottles, we need people to join us on the journey, people who are as convinced as we are that a small contribution from every individual can make a big difference and change the world for the better. We are therefore proud and grateful that we have already been able to convince numerous "CHANGE ambassadors" and that many people have already become part of our mission.

Together we can Change the World - sip by sip.

**SEBASTIAN VETTEL**  
FOUR-TIMES F1 WORLD CHAMPION

In 2021 Sebastian Vettel supported the BWT mission "Change the World - sip by sip" as a brand ambassador.

**JOANA HÄHLEN**  
SWISS TEAM ATHLETIN, SKI ALPIN

"I support the BWT Mission 'Change the World - sip by sip'. We want to use our limited resources sustainably and ensure that everyone on this planet has access to save and clean drinking water."

"I am very happy to become a new BWT Sport family member and to stand for the mission to 'Change the World - sip by sip' with so many other athletes. To use local water is such a great way to help our planet and to use existing resources and not plastic."

**HALVOR EGNER GRANERUD**  
OVERALL WORLD CUP WINNER 20/21  
FOUR HILLS TOURNAMENT WINNER 22/23

**BASTIAN BUUS**  
PORSCHE SUPER CUP ROOKIE CHAMPION 2022

"I am very excited about the upcoming future and the partnership with BWT. The idea of using local water is perfect. Especially for my sport, where I need a lot of water, drinking from the water dispenser saves me so much waste, plus it tastes fantastic."

**SMA'ESCH**  
VOLLEYBALL TEAM, SWITZERLAND

"We are not only playing in the pink BWT jerseys, we also fully support BWT's sustainable actions. Together we 'Change the World - sip by sip'."

Download your APP for free!

## COMPACT, POWERFUL ALL-ROUNDER WITH UV-LED TECHNOLOGY

The compact, powerful all-rounder can be used universally with medium water consumption. With all-round service and BWT hygiene system, it provides the highest standard of hygiene and, above all, great-tasting mineralized water – ambient, cold, sparkling or hot. AQA drink PRO 20 is available as a countertop or as a floorstanding solution (with integrated base cabinet).

- Available in: cold, ambient and sparkling water or hot, cold and sparkling water
- Cooling capacity 20 l/h and heating capacity 9 l/h
- Ideal for offices, lobbies and meeting rooms

The right appliance for every taste and every situation – regardless of your water preference. Whether you have a lot of space or even very little – with the different AQA drink PRO 20 versions, your needs are always satisfied.

Where higher capacities are required, for example in canteens, lobbies or meeting rooms, two or more units side by side can cover peak times and ensure maximal supply reliability.

- COUNTERTOP OR FLOORSTANDING UNIT
- EASY DISINFECTION WITH BWT EASYCARE SYSTEM
- 3-FOLD HYGIENE PROTECTION WITH BWT SYSTEM HYGIENE
- INDIVIDUAL DRINKING PLEASURE WITH 3 WATER OPTIONS

\* Connectivity via APP for smartphone

### DESIGN

The BWT AQA drink PRO 20 dispensers are characterised by a sleek and modern design – the white, glossy surfaces blend perfectly in. With its compact design it is easy and versatile to position.

### TECHNICAL FEATURES

The AQA drink PRO 20 is small but powerful, efficient and reliable – the functionality is intuitive and three different types of water are dispensed via practical touch buttons.

The cooling capacity is up to 20 l/h and the heating capacity is 9 l/h, perfect for offices and also homes.

A state-of-the-art UV-LED reactor directly before the water outlet prevents the system from being contaminated with bacteria. In addition to being active while dispensing, the UV-LED reactor activates periodically, to prevent recontamination. For your hygienic safety, the semi-automatic disinfection cycle with the easy to use BWT EasyCare is additionally recommended.

### INSTALLATION

The installation is very easy – all that is needed is a connection to the water and electricity supply using the supplied kit. No connection to the drain is required because all models have a matching drip tray that can be fitted with an additional container in the cabinet.

Touch buttons and refill point

Cup holder

# AQA drink PRO 30

## ELEGANCE, POWER AND SILENCE FOR YOUR OFFICE SPACES

BWT AQA Drink PRO 30 is the perfect water dispenser for office settings, and more generally any service industry setting. Elegantly and discreetly styled, this robust, silent running machine offers high-capacity refreshment through an ice bank chilling system that enables it to keep up with intermittently intense use.

The AQA drink PRO 30 is delivered fitted with a BWT filter head that allows the dispenser to be combined with BWT's extensive AQA drink mineralization and filtration offer. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

Its generous dimensions, and a dispensing area height of 750 mm, make it very comfortable to use: the dispensing area allows comfortable filling of 0,5 l bottles.

- Ideal for offices, lobbies and shops
- 3 versions available: combination of ambient, cold, sparkling or hot water

The water dispenser can easily be connected to a waste water using a transformation kit. A large capacity, side-mounted cup dispenser can be added to round out the installation. The cup dispenser may be mounted on the left- or right-hand side of the water dispenser.

For an even more hygienic operation, all three versions are also available with foot pedal controls in place of the push controls.

- CONVENIENCE, POWER AND SILENCE OF AN ICE BANK CHILLING SYSTEM
- INTERNAL SPACE FOR CO<sub>2</sub> CYLINDER
- PUSH BUTTON OR FOOT PEDAL CONTROLS AVAILABLE

\* Connectivity via B.Connect possible for devices up to 60 l/h

### DESIGN

The AQA drink PRO 30, made in our factory in France, features a pre-lacquered steel cabinet. In accordance with BWT's strong commitment to keep pushing the eco-design of BWT water dispensers, the top plate and the base are now made from post consumer recycled ABS.

### TECHNICAL FEATURES

Fitted with a 4,6 l ice bank, this water dispenser can easily fill 50 cups, one after the other, with an average temperature of 8°C the heat exchanger is made of copper, a naturally bacteriostatic material, to limit the risks of microbial growth.

The BWT filter head, depending on the type of filtration selected, must be installed to the rear of the dispenser on the outside. The active carbon filtration system can be installed inside the machine. For models with sparkling water, the user can easily select the carbonation level and replace the CO<sub>2</sub> cartridge at the rear of the machine.

### INSTALLATION

The installation is very easy – all that is needed is a connection to the water and electricity supply using the supplied kit. No connection to the drain is required because all models have a drip tray included.

\* Cup dispenser is sold separately. The machine will not come equipped with the cup dispenser

Dispensing control: push button or foot pedal

Adjustable carbonation and cup dispenser\*

## THE WATER DISPENSER WITH SUPERPOWERS

The BWT AQA drink PRO 60 impresses with its innovative technological features. It is built completely from high-quality stainless steel and has a powder coating finishing.

Regardless of your water preference, whether you have a lot of space or even very little – with the different versions of the AQA drink PRO 60 every need can be satisfied.

A state-of-the-art UV-LED reactor prevents the system from being contaminated with bacteria from the water outlet. In addition to being active during dispensing, the UV-LED reactor activates periodically to prevent recontamination. For your hygienic safety.

- Smart device – digital connection for easy monitoring, maintaining and fleet management
- Instant disinfection with advanced UV-LED technology
- 4 water options: ambient, cold, sparkling and light sparkling or hot
- Capacity: 60 l/h of cold and sparkling water or 26 l/h hot water
- Ideal for offices, Ho.Re.Ca. universe, hospitals, clinics, hotels

The device for every taste and every situation, no matter whether you like ambient, cold, sparkling or hot water.

- COUNTERTOP OR FLOORSTANDING UNIT
- EQUIPPED WITH UV-LED AT THE WATER OUTLET
- APP ASSISTED DISINFECTION WITH BWT EASYCARE

\* Connectivity via IoT technology

### SPECIAL BENEFITS

#### UV-LED technology

- Thanks to a state-of-the-art UV-LED reactor at the water outlet and an App assisted disinfection programme, the highest hygienic standards can be ensured

#### Portioning

- The unit can automatically dispense drinking glass, bottle or jug portions in customisable volumes
- Portioning can be selected with a single / double click on the respective selection button

#### CO<sub>2</sub> control

- Through an optionally available CO<sub>2</sub> monitor you will be notified before the CO<sub>2</sub> bottles runs out

#### Simple disinfection programme

- Semi-automatic disinfection cycle with the easy to use cartridge system BWT EasyCare
- Manageable without the need of a service technician via mobile App

#### Smart diagnostics

- Leakage detection with AQA stop
- Component specific fault recognition
- Drip tray (container) monitoring

#### Boiler (with integrated scale protection and PH control) – AQA drink PRO 60 HOT version

- Integrated, patent-registered, limescale protection - limescale deposits in the boiler are prevented by minimal reduction of the pH value of the supply water. No softening required and full mineralization options for every customer preference are available.
- Thanks to a precise pH control, brewed beverages will appear clearer in colour and smoother in taste
- Faster heating cycles because of a predictive heating algorithm
- More energy efficient due to an innovative tangential water injection system

## IOT CONNECTED ON THE B.FILTER PLATFORM

### Fleet management

- Always know the state of your devices in the field
- See consumable states and water consumption for single devices and whole customer fleets
- History and telemetry data lets you investigate issues before driving to the device location, using the time available as efficient as possible
- Receive real time notifications, alarms and reliable prediction of filter exhaustion
- See detailed statistics of the water consumption and intervention timeline for your customer base

- Control the population of filter cartridges in the field and see what filters and sizes are most suitable

### Temperature control

- Water temperatures can be easily adjusted via the mobile App or even remotely via the b.Filter platform

### Energy saving mode

- Enables the operator to turn off the boiler at desired times

## APP SUPPORT - THE BWT MOBILE APPS FOR A MORE USER-FRIENDLY EXPERIENCE

### Easy setup and configuration

- App supported step by step commissioning of the device
- Change parameters easily to adjust the water according to your individual needs

### Disinfection system

- Step by step guide for the disinfection process – all App controlled

### Simple cleaning system

- Semi-automatic cleaning cycle with the easy to use cartridge system BWT EasyCare
- Manageable via App without the need of a service technician

### Debug and control

- Ability to see the current state of your device in real time

### Touchless water dispensing

- Fill your carafe or glass without touching the device, minimising bacterial exchange – perfect for clinics and hospitals

## BWT BEST WATER PROFESSIONAL - FOR PROFESSIONAL DEVICE MANAGEMENT

Makes the water dispenser an IoT-enabled device and facilitates maintenance and monitoring for the operator:

- Step-by-step guide for easy installation and configuration. Operators can set:
  - Filter type and filter capacity
  - Water temperatures
  - Filling quantity (glass, carafe, bottle cup, pot)
- Step-by-step guide for easy cleaning and disinfection
- Real-time function and error overview via a debug menu
- Fleet management (or via the web page bfilter.bwt.com)
- Detailed statistics (or via the web page bfilter.bwt.com)

Trained users can use the app in combination with the bFilter platform. It is an online application which works with an available WiFi network only.

## BWT BEST WATER HOME - FOR USERS

- Touch-less operation of the water dispenser via NFC
- Selection of desired water option and quantity via the mobile phone
- Minimises bacterial contamination on the unit

No data is transferred to BWT.

Receive up-to-date information about your device status

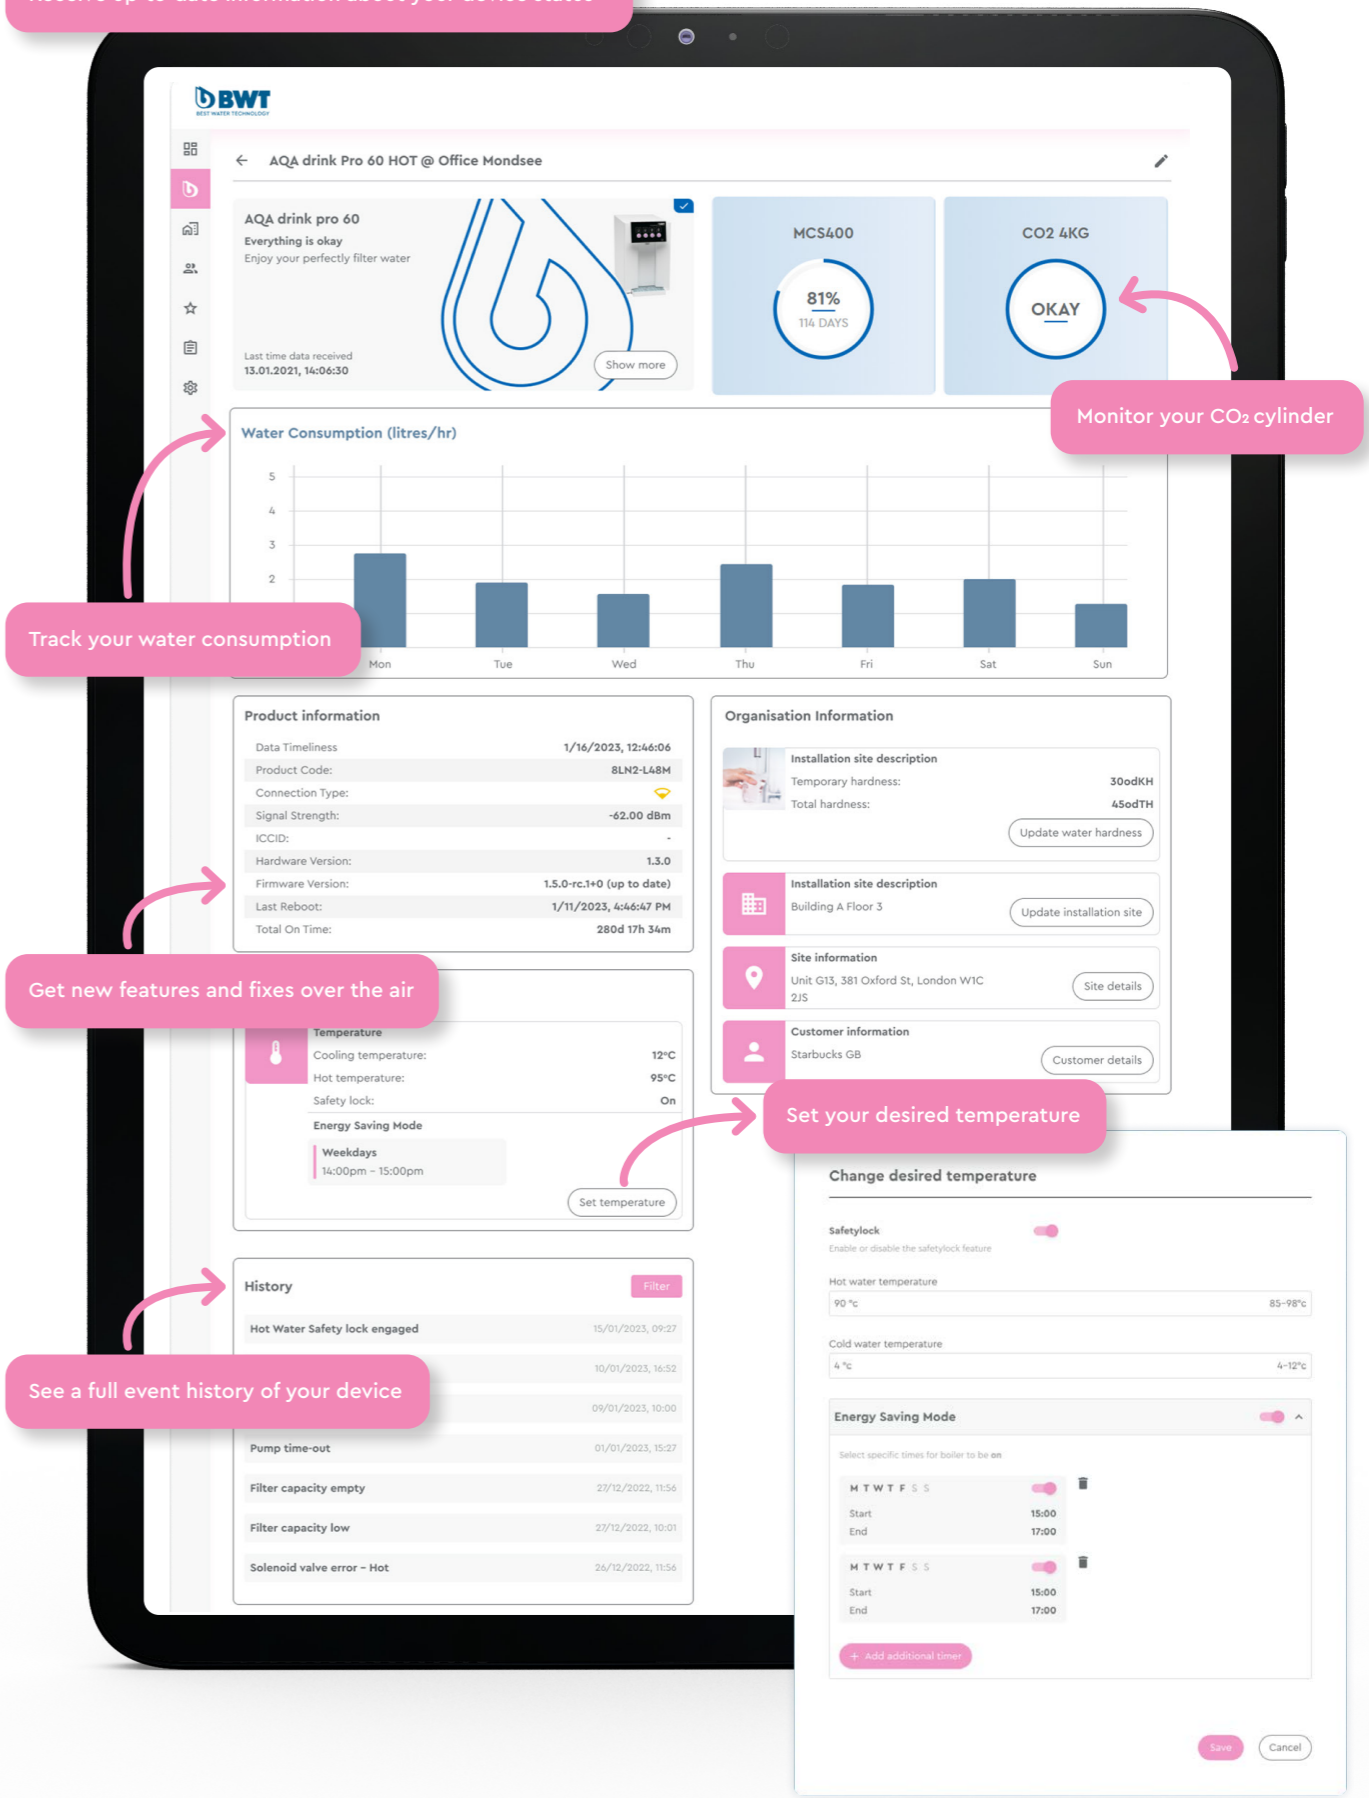

Track your water consumption

Get new features and fixes over the air

See a full event history of your device

Set your desired temperature

Monitor your CO<sub>2</sub> cylinder

AND MUCH MORE!

# AQA drink PRO SPRING

## A SOBER AND ROBUST DESIGN FOR CHALLENGING SETTINGS

The AQA drink PRO SPRING water dispenser is ideal for industrial settings or communal areas, where users want to quench their thirst or fill their bottles rapidly.

This simple, robust machine offers high-capacity refreshment through an ice bank chilling system that allows heavy use.

A 304L stainless steel basin is mounted on a pre-lacquered steel monoblock cabinet, which is mounted on adjustable feet for added stability of the machine.

3 versions are available:

- a mixed version fitted with 2 chilled water taps, a swan neck tap and a bubbler
- a version with a single chilled water swan neck tap operated by touch controls or a foot pedal control for more hygienic operation.

- Ideal for industrial settings
- Cold water
- Capacity: 30 l/h

It may be fitted with a BWT filter head (not supplied) to be installed to the rear of the water dispenser on the outside, to allow integration of BWT's AQA drink mineralization and filtration systems.

Customisation is possible: colour, number of taps, ambient water or hot water.

- SWAN NECK WITH OR WITHOUT BUBBLER
- STAINLESS STEEL BASIN AND PRE-LACQUERED STEEL CABINET
- TO BE PLUMBED INTO A WASTE WATER DRAIN

\* Connectivity via B.Connect possible for devices up to 60 l/h

### DESIGN

The cabinet is made of a single piece of pre-lacquered steel fitted with a 304L stainless steel basin. The cabinet is available in other colours, or even 100% 304L stainless steel.

### TECHNICAL FEATURES

Fitted with a 4,6 l ice bank, this water dispenser can cope with heavy use, dispensing chilled water with an average temperature of 8°C.

The heat exchanger is made of copper, a bacteriostatic material, to limit the risks of microbial growth.

The AQA drink PRO SPRING is equipped with 4 sturdy, adjustable feet to improve the stability of the machine.

The foot pedal control, if fitted, is made of stainless steel.

### INSTALLATION

The AQA drink PRO SPRING water dispenser must be plumbed into a waste water line.

Buttons or foot pedal

# AQA drink PRO COMMERCIAL

## STOP THE USE OF PLASTIC BOTTLES

The AQA drink PRO COMMERCIAL water dispenser, which will be available from April 2023, in every way supports BWT's commitment, where each individual can refill their personal bottle as many times as they wish.

Particularly large, with a stripped back design, the AQA drink PRO COMMERCIAL water dispenser will allow every visitor to the public to fill their reusable flasks and bottles.

Featuring a generously proportioned service area, dispensing of chilled water is controlled by dual detection by infrared sensors, extremely intuitive and non-touch.

To allow installation in any location, and notably to avoid the restrictive requirement for access to a waste water drain, the AQA drink PRO COMMERCIAL is fitted with an exceptionally large volume 5 l drip tray that is continuously monitored and very easy and safe to empty.

The 100% epoxy steel cabinet was designed to ensure the excellent stability of the AQA drink PRO COMMERCIAL dispenser and to allow full, unhindered access to the technical components by fully opening the front of the machine.

- Ideal for all locations open to the public
- Cold water
- Capacity: 80 l/h

The machine is delivered with a BWT filter head that allows the dispenser to be combined with BWT's extensive AQA drink mineralization and filtration solutions. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

- TOUCHLESS FILLING OF ANY BOTTLE
- ELECTRONICALLY MONITORED 5 L DRIP TRAY, EASY TO EMPTY
- TECHNICAL ACCESS TO THE MACHINE BY OPENING IT FRONTALLY

\* Connectivity via B.Connect possible for devices up to 60 l/h

Weight kg (approx.)	71
Material of construction	Powder coated steel
Water selection point	Touchless

### DESIGN

This water dispenser features real innovations. With an overall height of 1,60 m its dispensing area is generously proportioned and accessible to all.

Made of epoxy painted sheet metal, it can be customized. Those in charge of maintenance will appreciate its rounded shape, while technicians can open the machine fully for unhindered access to all the technical components.

### TECHNICAL FEATURES

Fitted with a reliable ice bank with a capacity of 4,6 l, the AQA drink PRO COMMERCIAL is designed to be supplied with water and electricity from a technical ceiling grid.

Its epoxy steel cabinet is delivered assembled on a solid pedestal that may in turn be secured to the floor if necessary.

The machine's chilling function can be suspended during winter periods for added comfort and to save energy.

A version that can be connected to a waste water drain will be released during 2023, as will a version offering ambient water, without chilling.

In accordance with the more demanding ecodesign policy for these machines, all plastic parts of the machines are made of post consumer recycled plastic.

### INSTALLATION

The installation is very easy: a simple connection to the water mains using the supplied kit is all that is needed.

## THE WATER DISPENSER FOR A TASTE AND WELLNESS BREAK

AQA drink PRO SPRINT is the new BWT product designed for offices, gyms, canteens and spas: not only does it provide good, zero-kilometre water, cold and sparkling, but also many fresh and natural flavours thanks to the beWell essence bag-in-boxes.

You can choose up to 4 different essences, all rich in important vitamins for your well-being.

Its elegant lines and high-quality materials make it perfect for exclusive, designer environments. Thanks to its easy and intuitive touch screen monitor, you can choose your drink and customise it. The essences can be modulated to have more or less concentrated, natural or sparkling drinks.

AQA drink PRO SPRINT can be connected via Wi-Fi for remote control of alarms, set different drink costs and set access permissions for different users.

- 2 different models are available: 2 types of water + 2 essences or 2 types of water + 4 essences
- Capacity: 15 l/h cold and sparkling water + 2 or 4 essences
- Ideal for offices, Ho.Re.Ca. universe, gyms, SPA and hotels
- Touch screen monitor and QR code reader integrated in the front allowing you to monitor consumption and/or give selective access to consumption

It can dispense 2 portions for 2 different types of water + 4 essences, and it's possible to combine with BWT's AQA drink mineralization and filtration solutions.

In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

- TOUCH SCREEN MONITOR WITH QR CODE READER
- ILLUMINATED DISPENSING POINT
- CONNECTION TO NFC PAYMENT SYSTEM (OPTIONAL)

\* Connectivity via IoT technology

## DESIGN

The BWT AQA drink PRO SPRINT dispensers are characterised by a sleek and modern design – the black surface and the large, highly customisable touch screen display blend perfectly in.

## TECHNICAL FEATURES

The AQA drink PRO SPRINT is easy to install and practical to use thanks to a simple and intuitive step-by-step menu.

It fits on any countertop, but a dedicated cabinet is available (optional), with space for the BWT mineralizer cartridge and CO<sub>2</sub> cylinder for your sparkling drinks: it's perfect for keeping everything tidy in one place! The optional cup riser allows you to dispense your drinks in the glass or carafe in comfort.

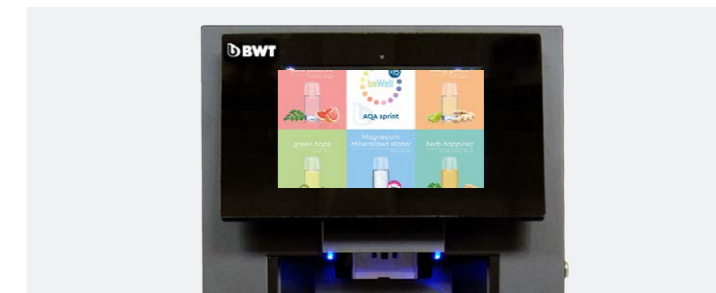

For your hygienic safety, the semi-automatic disinfection cycle with the easy to use BWT EasyCare system is additionally recommended.

## INSTALLATION

The installation is very easy – all that is needed is a connection to the water and electricity supply using the supplied kit.

No connection to the drain is required thanks to the large drip tray (with sensor that stops dispensing when full) or the additional container in the cabinet.

Touch screen monitor

Cup lifter (optional)

# BEWELL +15

## EXTRA BOOST FOR YOUR MINERALIZED WATER!

beWell+15 is a new, unique lifestyle beverage system that brings more freshness to your life every day in a refreshingly natural and tasty way. The secret of the completely new, different and delicious beWell beverages lies in their fresh preparation with essences extracted from fruits, and best of all with BWT mineralized water.

4 different, revitalising and tasty essences made from fruits and herbs – a delicious, thirst-quenching and healthy drink!

The essences are packaged in convenient bag-in-boxes with a special airtight safety membrane.

The head of the connection element makes it easy to set up a secure, quick-connect connection. Hygiene and safety in the most convenient way possible.

Our essences are precious, this is why we succeeded in achieving a high-performance mixing ratio in which we have 1 part essence to 9 parts water (adjustable from the AQA drink PRO SPRINT menu).

The essence contained in each bag-in-box enables the dispensing of up to 150 glasses of 200 ml beverage.

This, compared to the use of bottled beverages, allows a reduction of about 98% of the waste released into the environment, making AQA drink PRO SPRINT the perfect ally for the environmentally aware.

- Use local resources and support the environment
- Offer the best quality beverage, 24/7
- Keep up with the times by offering something new

## STEEL DISPENSERS WITH MECHANICAL FAUCETS

BWT AQA drink TAP is the range of mechanical dispensing water dispensers counter top designed to meet the highest standards of reliability and efficiency.

The small dimensions allow the dispenser to be easily positioned on any countertop.

They are the smart solution to protect the environment by reducing the use of single-use plastic bottles.

They can easily find a place in a bar or restaurant, allowing you to drink good water the easy way, simply by pulling the corresponding lever.

The AQA drink TAP range includes a wide selection of professional water coolers, robust and reliable over time, which meet the highest quality standards for performance and product quality.

Available also with cold and ambient only.

- Ideal for bars, restaurants, canteens
- 2 or 3 water options: ambient and cold or ambient, cold and sparkling
- Capacity: 50 to 120 l/h (higher capacities available upon demand)
- With 2 or 3 manual faucets

All models can dispense three different types of water: ambient, cold and sparkling.

It's possible to combine BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

- ICE BANK SYSTEM
- STAINLESS STEEL DESIGN
- DRIP TRAY INCLUDED

\* Connectivity via b.Connect possible for devices up to 60 l/h

## DESIGN

The BWT AQA drink TAP water dispensers are characterised by their small dimensions and minimalist design.

From the first glance, the stainless steel case conveys a feeling of robustness and cleanliness.

Methacrylate panel of innovative technology combined with a particularly bright colour guaranteed for more than 20 years against UV rays.

Colors available: white or black; dark grey or blue upon demand. Surfaces can be easily sanitised.

## TECHNICAL FEATURES

Water cooling technology using an ice bank system guarantees cold water in large quantities with low energy consumption. The water is dispensed by pulling the corresponding faucets.

## INSTALLATION

The installation is very simple: all that is needed is a simple connection to the water and electricity supply using the supplied kit. No connection to the drain is required, all models have a matching drip tray.

## WATER DISPENSERS FOR THOSE WHO WANT TO MAXIMISE THE SPACE ON THE TOP

BWT AQA drink COOLER is the complete range of water dispensers that, thanks to their compact dimensions and the fact that they can be installed under the sink, leave you plenty of free space on the counter.

The small dimensions allow the dispensers to be easily positioned without impacting on the aesthetics of your venue.

They fit inside the kitchen cabinets, together with the filter and CO<sub>2</sub> cylinder, and they can be connected to the matching column and drip tray.

The AQA drink COOLER range includes a wide selection of professional water coolers, robust and reliable over time, which meet the highest quality standards for performance and product quality.

- Ideal for bars, restaurants, canteens
- 2 or 3 water options: ambient and cold or ambient, cold and sparkling
- Capacity: 50 to 120 l/h (higher capacities available upon demand)

It's possible to combine BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

The dispenser needs to be combined with one or more dispensing towers with taps.

- ICE BANK SYSTEM
- SAVING SPACE ON THE COUNTER
- STURDY AND FUNCTIONAL DESIGN

\* Connectivity via B.CONNECT possible for devices up to 60 l/h

## DESIGN

BWT AQA drink COOLER dispensers are characterised by their small dimensions and minimalist design.

They convey a robust and clean feel. Surfaces can be easily sanitised.

## TECHNICAL FEATURES

Water cooling technology using an ice bank system guarantees cold and sparkling water in large quantities with low energy consumption.

The water is dispensed via the matching dispensing tower.

## INSTALLATION

The installation is very easy: a simple connection to the water mains, electricity and dispensing tower \* (to be purchased separately, see next pages) using the supplied kit is all that is needed.

Quick connections are positioned on the front of the dispenser.

\*Dispensing tower (AQA drink DIGI TOWER or AQA drink TOWER) must be purchased separately

# AQA drink DIGI TOWER & TOWER

## PERFECT MATCH WITH AQA DRINK COOLER RANGE

2 or 3-way dispensing towers with volumetric portion control or manual faucets. They allow rapid filling of jugs or bottles. A drip tray is always included in the delivery of the tower. The dispensing column is to be combined with an AQA drink COOLER.

### AQA drink DIGI TOWER

Dispensing towers with display and volumetric portion control, allowing jugs or bottles to be filled quickly. This electronically controlled version (only for AQA drink DIGI TOWER) allows water to be dispensed at a pre-set volume by setting the exact quantity to be dispensed. The quantities can be set by the user. The columns are made in steel and methacrylate. High quality materials that make them sturdy and easy to clean. Their modern look is sure to catch the eye at the restaurant counter!

- Executive protocol payment system connection (with serial card)
- Display of total litres dispensed and partial counters for each selection
- Self-learning dose programming
- Water filter autonomy and UV-LED lamp life
- Management of lack of CO<sub>2</sub> with dedicated pressure switch
- Ice bank temperature control with probe and relative compressor control
- Input for managing 2 volumetric counters
- Management of a waste water tank

### AQA drink TOWER

Manual-type dispensing columns available with 2 or 3 dispensing manual taps. These columns are made of chromed metal. The industrial look makes them suitable for use in many venues. They can also be customised with medallions indicating the different types of water. You can choose column with 2 or 3 faucets. Medallions (optional) are available to indicate the type of drink.

## MODERN AND STYLISH LOOK. SIMPLY STUNNING

BWT AQA drink UNIVERSITY 35 is a standalone dispenser characterised by a pleasant, modern and space-saving design. It guarantees an impressive water supply by mains water cooling technology with the use of an ice bank system. The water is dispensed by using vandal-proof steel buttons that are located in two positions: either on the column or on the body of the dispenser, so that they can also be used by handicapped persons. AQA drink UNIVERSITY 35 has a design that fits anywhere because it is beautiful, sophisticated and contemporary. It transforms an office, a university corridor or a waiting room with its presence alone, thanks to its rounded, minimal silhouette, the contrast between painted metal and stainless steel, and the large customisable surfaces.

- Ideal for offices, schools, sport centres and small canteens
- Cold and sparkling water
- Capacity: 35 l/h
- Space for filter and CO<sub>2</sub> cylinder inside the cabinet

It can dispense 2 types of water: cold and sparkling. Inside its cabinet there is space for a BWT AQA drink mineralization and filtration and a CO<sub>2</sub> cylinder up to 10 kg. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system. There is also a 5-litre drain water container at the back.

- ICE BANK SYSTEM
- GREATEST AUTONOMY WITH A 10 KG CO<sub>2</sub> CYLINDER
- MODERN AND STYLISH LOOK

\* Connectivity via b.Connect possible for devices up to 60 l/h

## DESIGN

The AQA drink UNIVERSITY 35 is characterised by high performance together with a modern, elegant design: the stainless steel of the column, its sinuous curves and the painted steel of the frame combine to perfection in a simply stunning dispenser. It has surfaces without edges, making it suitable and comfortable for use in public areas. AQA drink UNIVERSITY 35 is designed to ensure a unique and pleasant experience, always providing water at the right temperature.

## TECHNICAL FEATURES

Water cooling technology with the use of an ice bank system ensures cold and sparkling water up to 35 l/h, with low energy consumption. The water dispenser is silent and can be placed near classrooms, offices and meeting rooms.

## INSTALLATION

The installation is very simple: just a simple connection to the water and electricity supply using the supplied kit is needed. Thanks to a 5 litre waste water tank installed on the back of the dispenser it does not need to be connected to the drain.

# AQA drink KIDS

## EDUCATING THE NEW GENERATIONS TO BECOME CHANGE AMBASSADORS, SIP BY SIP

Change your lifestyle. Enjoying locally produced, mineralized drinking water in best quality.

Change the world. No need to ship bottled water any longer around the world. Consequently, reducing plastic waste, avoiding transportation costs, and minimizing the CO<sub>2</sub> footprint.

BWT AQA drink KIDS leans on the success of its 'big brother', the AQA drink 35 UNIVERSITY, and is designed for all situations where cold and/or sparkling water is not required, such as primary and secondary schools.

Its shape is very playful and calls the attention of children.

It is the smart solution to protect the environment by reducing the use of single-use plastic bottles in schools and provides a safe source of filtered water at room temperature.

- The dispenser is available in two different heights depending on the school (Primary or secondary school)
- Ideal for children
- Still ambient water

It's possible to combine BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

- INTERNAL SPACE TO PLACE A FILTER CARTRIDGE
- 2 DIFFERENT HEIGHTS FOR DIFFERENT SCHOOLS

\* Connectivity via b.Connect possible for devices up to 60 l/h

### DESIGN

BWT AQA drink KIDS takes up little space and can be easily placed in corridors and common areas: it can be customised with the logo of the school.

The water is dispensed by using a vandal-proof steel button located on the side of the device, in a convenient position for children and people with disabilities.

On the back there is a bracket to fix the dispenser to the wall.

There is also space for a waste water tank.

### TECHNICAL FEATURES

The dispenser is available in two different heights, designed for primary school (KIDS PS) or secondary school (KIDS SS).

The dispensing point is protected by a stainless steel cage that protects the dispenser from contact with hands or bottles.

This cage also bears the engraved BWT logo.

### INSTALLATION

The installation is very easy: a simple connection to the water mains using the supplied kit is all that is needed.

Thanks to a 5 litre waste water tank installed on the back of the dispenser, eliminating the need to connect it to the drain.

No electrical connection is required.

# AQA drink CATERING

## POWERFUL AND ROBUST FOR COLLECTIVE CATERING

The AQA drink CATERING is the ideal water dispenser for collective catering settings, such as company canteens and lunchrooms. It can be easily integrated into the self-service settings of these communal spaces.

The AQA drink CATERING is available with a choice of two chilling capacities, each version is equipped with 2 cold water taps each controlled by a 3-position button.

The entire cabinet is made of 304L stainless steel and features a hatch for easy access to the machine and filtration system.

The basic models of this water dispenser should be connected to a waste water line.

This product line is also available with other chilling capacities and may be extensively configured with numerous options.

- Ideal for school canteens and cafeterias
- Cold water
- Capacity: 80 to 120 l/h

It's possible to combine BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

### DESIGN

The AQA drink CATERING, made in our factory in France, features a very hardwearing cabinet made entirely of 304L stainless steel 1 mm thick. The cold water tap aerators are protected by transparent corner guards.

The drip tray grate, also made of 304L stainless steel, can be removed to make daily cleaning as easy as possible.

An access hatch on the front, locked by a single screw, and a removable, rear backslash allow comfortable access to all components of the machine.

### TECHNICAL FEATURES

Equipped with two reliable ice-banks with a capacity of 4,6 and 9,6 l. Other versions can be fitted with more powerful ice banks.

The cabinet is made entirely of 304L stainless steel 1 mm thick, conferring a service life on the machine that is renowned on the market. The AQA drink CATERING can be fitted with numerous options, allowing it to be configured and manufactured on request: touchless pedal or infrared sensor controls, controls for persons with reduced mobility, child sizes, ambient water or hot water taps, spray fillers.

### INSTALLATION

The installation is very easy: a simple connection to the water mains using the supplied kit is all that is needed.

\* Optional. Internal drain water recovery system\* and pedal\* are sold separately

# AQA drink POWER MOBILE BAR

## DIRECTLY FROM FORMULA 1, THE SOLUTION FOR HIGH PERFORMANCE WATER DISPENSERS EVERYWHERE

BWT AQA drink POWER MOBILE BARS were made to satisfy the demand of sport events. These bars are dispensing counters equipped with steel cabinet doors on four sides. They can be easily sanitised and customised with adhesive films. They are designed to be easily transported and assembled on site, at sports events but also in canteens and restaurants.

- Ideal for bars, restaurants, canteens, sport centres and events
- Cold and sparkling water
- Capacity: up to 600 l/h

They have one, two or four dispensing columns and can dispense three types of filtered water with BWT Mineralized Water technology, ambient, cold and sparkling. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

The filter is installed inside the cabinet, together with the CO<sub>2</sub> cylinder and accessories.

### DESIGN

BWT AQA drink POWER MOBILE BAR is characterised by a very sturdy design and is suitable for use in transit areas. The bar is easily customisable by using adhesive films. The water dispenser rests on sturdy wheels capable of supporting up to 120 kg each. In addition, a flight case (that can be moved with pallet trucks) is available for easy transport to different locations.

### TECHNICAL FEATURES

Inside the cabinet there is a water dispenser for cold and sparkling water with ice bank technology. The AQA drink mineralizer and filtration cartridge and CO<sub>2</sub> cylinder also fit inside. The water is then dispensed via 1, 2 or 4 columns placed on the top. These columns are equipped with a touch screen for choosing the desired water.

### INSTALLATION

The installation is done by connecting the BWT AQA drink POWER MOBILE BAR to the water and electricity supply using the supplied kit. A door for access to the technical compartment makes maintenance easier.

REVERSE OSMOSIS FOR DOMESTIC AND  
HO.RE.CA. UNIVERSE

# REVERSE OSMOSIS SOLUTIONS

*Reverse osmosis technology has been widely used for many years in both the domestic and Ho.Re.Ca. universe.*

*For safe drinking water at home, professional coffee machines, dishwashers, ovens, combi steamers or for any other application where even local water with high content of dissolved minerals (salted water) needs to be demineralised: BWT's reverse osmosis systems provide practical and unique solutions everywhere.*

**For You and Planet Blue.**

# THERO 90 / 90 PRO

## POWERFUL WATER TREATMENT SOLUTION WITH APP CONTROL FOR ESPECIALLY DIFFICULT CASES

Pure water, free of microplastics and nanoparticles, directly from the tap – independent of the local water quality.

Clean water that can be used, drunk and fully enjoyed without hesitation: this is one pillar of health. Water of this quality is not always available. Salts, odour and taste-impairing substances, agricultural or drug residues, but also microplastics and bacteria can affect the purity of water.

It is possible to obtain pure, fresh water at home at any time – regardless of the quality of the tap water.

The powerful and space-saving BWT THERO 90 & THERO 90 PRO from BWT's new generation of reverse osmosis – makes it possible. Just turn on the tap and wash fruits or vegetables, or fill a glass with fresh, pure water!

→ Produce 1,5 litres of water per minute – on demand

As the BWT THERO 90 PRO with Bluetooth connection or as manual basic version THERO 90. With the mobile App (only available in the PRO version) the device can be easily controlled and monitored.

The app is connected to the end device, tablet or smartphone via Bluetooth.

- » Monitoring water quality – permeate (in TDS or µS/cm)
- » Input water meter for monitoring water consumption
- » Operating hours counter
- » Status and alarm indication

- EASY INSTALLATION
- NO STORAGE TANK REQUIRED
- EASY MEMBRANE CHANGE

\* Connectivity via APP for smartphone  
\*\* BWT RO System APP is available only for BWT Thero 90 PRO

Dimensions (WxDxH) mm	121x264x451	
Weight kg (approx.)	9	
Material of construction	Aluminium	
Filter exchange	At least every 2 years	

### DESIGN

Low noise & low vibration: the aluminium construction enables low noise and vibration operation and prolongs the pump's service life thanks to optimum heat dissipation.

### TECHNICAL FEATURES

Highly efficient and reliable, the BWT THERO 90 / 90 PRO can produce 1,5 litres of water per minute, with no storage tank required.

For even greater hygienic safety, the membrane is flushed for 10 seconds after each production or every 3 hours if no water production occurs. With its special filter technology – a 'reverse osmosis' membrane – it provides purified H<sub>2</sub>O on demand.

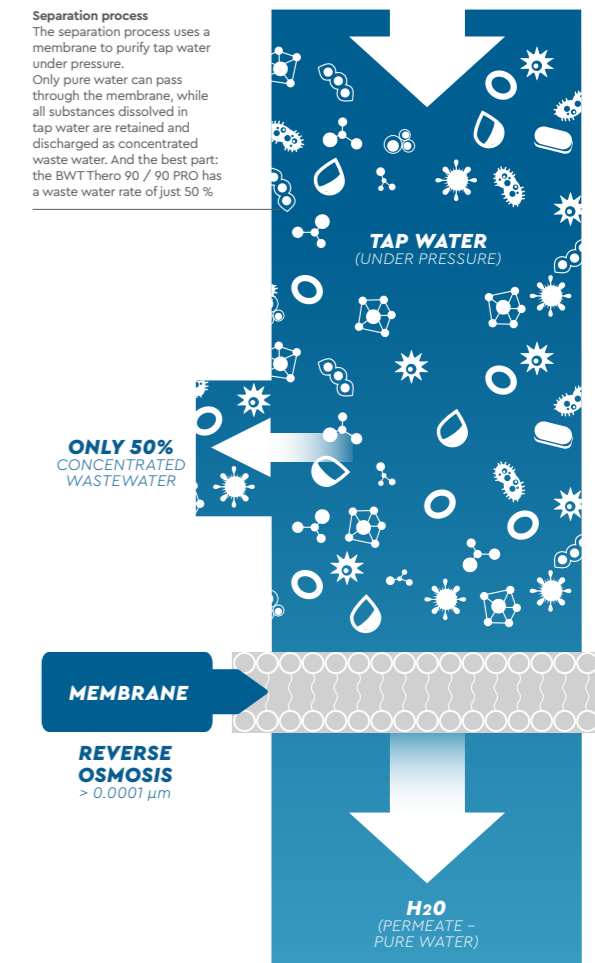

Heavy metals, microplastics, bacteria, viruses, hormones, nitrates, limescale and other contaminants are washed away and at least 98% of salts are removed.

### INSTALLATION

The BWT THERO 90PRO's space saving design enables it to be installed discreetly under the sink and connected to the mains water supply.

The usual household water pressure is increased by the integrated pump for a consistent permeate flowrate.

In parallel the concentrated wastewater is automatically drained.

Membrane changing every 2 years

Easy membrane change – no tools required

# BESTAQUA ROC

We support:

## A QUANTUM LEAP FOR WATER OPTIMISATION IN THE FOOD SERVICE SECTOR: DELIVERS MINERALIZED WATER FOR COFFEE OUT OF ANY LOCAL WATER

BWT has completely redefined its equipment with reverse osmosis technology, making it more compact, more efficient, and with even better performance.

BWT Bestaqua ROC is setting new standards in water optimisation for the food service sector.

It has never been so easy, reliable and cost-effective to treat local tap water to achieve pure water for the specific requirements of the food sector. The BWT Bestaqua ROC is equipped with one of the most high-performance membranes in the world that comes from BWT. It will run and run... maintenance-free and ultra-efficient.

The BWT Bestaqua ROC reverse osmosis really plays to its strengths in situations where there is high demand for pure water or a high level of unwanted substances in the raw water and where standardised water optimisation is needed to produce reliable and consistent results worldwide.

- 3 models available: Bestaqua ROC 14, 16 and ROC Coffee BWT
- Bestaqua ROC systems were designed to meet the high demands of the catering industry

It was developed for perfect coffee, tea and hot drinks with an intense aroma and full flavour, for producing pure water such as needed to produce steam for combination steamers or steam ovens and for a steam feed when baking. The technology also makes sure dishes look spotless when they come out of the dishwasher to create a glistening table setting at your restaurant.

It also enables all unwanted substances to be removed from the water effortlessly, allowing the water to vaporise entirely without residues. The water optimisation ensured by BWT Bestaqua ROC systems is the best preventive care for appliances in the catering industry.

### TECHNICAL FEATURES

Guests have high expectations.

Restaurateurs can only comprehensively satisfy their needs in a perfect ambience. And how banal it may sound, guest satisfaction has a lot to do with perfecting the "basics", such as the washing of dishes and cutlery. The BWT Bestaqua 14 and 16 ROC system is one of the best water optimisation concepts that lets your tableware shine in all its glory. Its pure water prevents marks from drying on and stops smearing. For consistently flawless crockery, brilliant glasses and sparkling cutlery, along with the eyes of your guests likewise gleaming in satisfaction. It can also save you a lot on cleaning products and on polishing glasses and cutlery by hand. BWT Bestaqua 14 ROC Coffee fulfils the demand for standardised water optimisation and delivers remarkable results in coffee production worldwide.

### APPLICATION

Water free from unwanted substances, ideal for:

- Compact dishwashers
- Baking ovens
- Combination steamers
- Steam ovens
- Steam boilers
- Coffee machines (always with remineralisation filters)

For perfect coffees, steaming and washing

Easy membrane change – no tools required

WATER DISPENSERS FOR HOSPITALS AND  
NURSING HOMES

# HEALTH UNIVERSE

*The world of hospitals or nursing homes has the imperative to fight against any risk of healthcare acquired infection, also when quenching the thirst of their patients or staff.*

*In these contexts, water dispensers with continuous water disinfection devices throughout their service are in demand to avoid any possible bacteriological proliferation.*

**For You and Planet Blue.**

# AQA drink CLINIC

## CONTINUOUS MICROBIOLOGICAL SAFETY OF DISPENSED WATER

The AQA drink CLINIC water dispenser, scheduled for release in April 2023, meets every requirement necessary to ensure the constant microbiological safety of dispensed water. It is particularly suitable for hospital establishments and retirement homes, and more generally any sensitive environments.

AQA drink CLINIC features the latest UV-LED disinfection technology, now capable of continuously treating water dispensed at a flow rate of 2 l/min. This technology has a service life of several years, compared to annual replacement for Mercury lamps.

The UV-LED disinfection of the dispensed water is monitored electronically by the machine, which signals any need to replace a component. Its very user friendly touch screen offers a volumetric portioning service, the volume served can be adjusted by the installer or the user. It comes with two chilled water taps, however ambient and sparkling water versions will be available.

- Ideal for hospitals and retirement homes
- Cold water
- Capacity: 60 l/h

It's possible to combine BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

- CONTINUOUS DISINFECTION OF THE WATER BY UV-LED
- TOUCH SCREEN CONTROLS AND VOLUMETRIC PORTIONING
- ELECTRONIC MONITORING OF THE MACHINE

## DESIGN

This water dispenser offers real innovations in terms of microbiological safety.

The touch screen is perfectly integrated into the water dispenser's control panel. Extremely user-friendly, it will, be available in several languages.

Made entirely of 304L stainless steel 1 mm thick, AQA drink CLINIC shares the same cabinet of the AQA drink FS, thousands of which are already in use.

## TECHNICAL FEATURES

Fitted with a 4,6 l ice bank, the AQA drink CLINIC comes with two cold water taps.

Electronic supervision of the water dispenser, besides continuous tracking of the UV-LED disinfection components, it includes an intuitive touch screen, especially for the volumetric dispensing control. The volume dispensed can be set by the installer, or adjusted by the user in 10cl increments.

An installer menu allows configuration of the machine upon installation, as well as self-diagnosis and access to the water dispenser log.

Dispensing tap aerators, currently mechanically built into the machine to protect as much as possible against back contamination, will be replaced before the end of 2023 with BWT's new self-disinfecting aerators (patented) that will also be electronically monitored by the machine.

WATER DISPENSERS FOR PUBLIC VENUES

# **PUBLIC VENUES**

*Global warming is a fact and regular consumption of drinking water becomes even more important.*

*BWT offers drinking water dispensers for the community. A public place for recreation where all citizens can enjoy safe, locally produced, mineralized drinking water. Just refilling existing bottles and avoid buying single use plastic bottles to manage personal hydration.*

**For You and Planet Blue.**

## TRANSFORMS THE STREETS OF THE CITY IN PLACES WHERE IT'S A PLEASURE TO LIVE!

Designed for outdoor use in educational and recreational areas, BWT AQA drink URBAN fountains can be used as a refill point for bottles or simply as a watering point.

These dispensers stem from BWT's extensive experience with AQA drink CITY STATIONS.

They fit perfectly into different urban environments thanks to their contemporary colours and shape.

The position of the buttons also makes them suitable for use by wheelchair users.

They have a concrete base structure, resistant to weather and dog faeces, on which the fountain in painted AISI 316 stainless steel rests.

The surface is protected by an easy-to-clean anti-vandal paint and an unalterable polyurethane finish that is resistant to solvents.

To complete the entire design: a panel on the back can be used as an advertising tool and a dispensing point has been designed to pamper dogs as well.

- Ideal for open public spaces
- Still ambient water

Dispensing of mineralized water from 3 different points: at the gush, for drinking directly, from the dispenser for refilling bottles and for small pets.

- MODERN AND STYLISH LOOK
- INTERNAL SPACE TO PLACE A FILTER CARTRIDGE

### DESIGN

The AQA drink URBAN dispensers are characterised by a concrete element for the base and painted stainless steel for the upper part. The covered dispensing point is made of AISI 316L and is protected by a stainless steel cage, to ensure hygiene between users.

Surfaces are painted with a vandal-proof polish (heat and light resistant) with an unalterable polyurethane finish resistant to solvents (for example: cans of spray paint).

There is also a drinking point on the side for small pets.

### TECHNICAL FEATURES

Safe materials that don't release unwanted substances are used for the hydraulic parts, in accordance to the most restricted regulations. Water pipes are insulated to prevent them from freezing. The hydraulic system is designed in order to avoid contact between drinking and waste water.

### INSTALLATION

In order to install AQA drink URBAN, it is necessary to prepare a flat space with mains water inlets and water drainage. No electrical connection is required.

\*White colour. Other colours are available on request

## SUPPLIED WITH SAFE WATER IN EVERY PARK OF THE CITY

BWT AQA drink STONE is a public water dispenser suitable for public event venues, parks, sports centres, stations and concert halls. It's made entirely of vibrocompressed concrete and steel. It is resistant to weathering, wear and tear, rust and is easily sanitised. 4 simultaneous dispensing points and high quality construction, it is the best solution for installations where heavy use is required. It has a pleasant and modern design with small dimensions. Still ambient water is dispensed via vandal-proof steel buttons: they are placed around the dispenser.

- Ideal for open public spaces
- Still ambient water

Mineralized water is dispensed from 4 points at the same time. At the 4 dispensing points there is a grid with a concentric design to help centre the water bottle more easily.

- MODERN AND STYLISH LOOK
- INTERNAL SPACE TO PLACE A FILTER CARTRIDGE

## DESIGN

Designed for outdoor use in urban and recreational areas, the BWT AQA drink STONE is a public dispenser with multiple water dispensing points.

In fact, the stainless steel dispensing area features 4 simultaneous withdrawal points. In this way, AQA drink STONE is also perfect for sports centres and parks.

AQA drink STONE is made of vibrocompressed concrete and stainless steel, with carved BWT logo.

The water-bottle refilling area is covered and made of AISI 316 stainless steel, to ensure maximum hygiene.

## TECHNICAL FEATURES

Safe materials that don't release unwanted substances are used for the hydraulic parts, in accordance to the most restricted regulations. Water pipes are insulated to prevent them from freezing. The hydraulic system is designed in order to avoid contact between drinking and waste water.

## INSTALLATION

In order to install AQA drink STONE, it is necessary to prepare a flat space with mains water inlets and water drainage.

# AQA drink COMPACT 60

CUSTOMISED PROJECT EXECUTION

## IS IT POSSIBLE TO DRINK COOL, FRESH, MINERALIZED WATER WHEN YOU'RE ON THE GO WITHOUT BUYING BOTTLED WATER? YES, WITH AQA DRINK COMPACT 60!

BWT AQA drink COMPACT 60 automatic water dispenser is a stand-alone system for dispensing mineralized and filtered water. Self-service refill water is easily accessible and affordable because the cost of water is lower than bottled water. It can be applied in any part of the world. Enjoy supplying millions of customers with high quality water and prevent tons of plastic waste.

- Ideal for shopping malls, supermarkets and public places
- Ambient, cold and sparkling water

Inside the AQA drink COMPACT 60 it's possible to combine BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

# AQA drink STADIUM 330

AVAILABLE FROM APRIL 2023

## THE WATER DISPENSER FOR PUBLIC VENUES

BWT AQA drink STADIUM 330 is the solution designed by BWT for high-traffic areas where large quantities of water need to be dispensed in a short time. It is a robust dispenser with 4 dispensing points that will free you from single-use plastic bottles. It can dispense large quantities of cold and sparkling mineralized water.

It guarantees a large water supply by mains water cooling technology with the use of a 330 l/h ice bank system.

The water is dispensed by using robust, vandal-proof buttons located near the 4 outlets or dispensing points.

Up to 2 x 20 kg CO<sub>2</sub> cylinders can be placed in the side of the dispenser to ensure a large autonomy of sparkling water and reduce maintenance costs.

- Ideal for public spaces
- Cold and sparkling water
- Capacity: 330 l/h

It's possible to combine BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable inerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

Inside the technical compartment there is also space for 2 x 20 CO<sub>2</sub> cylinders (to be rented on site).

- ICE BANK SYSTEM
- GREATEST AUTONOMY WITH A 2 X 20 CO<sub>2</sub> CYLINDER
- MODERN AND STYLISH LOOK

Material of construction	Stainless steel / painted
Water selection point	Push buttons

### DESIGN

The BWT AQA drink STADIUM 330 is characterised by high performance together with a modern, elegant design and is suitable for use in transit areas. The structure is easily customisable by using adhesive films.

AQA drink STADIUM 330 is designed to ensure a unique and pleasant experience, always providing water at the right temperature.

### TECHNICAL FEATURES

Mains water cooling technology with the use of an ice bank system ensures cold and sparkling water up to 330 l/h.

Canteens or large restaurants can in fact have all the water they need thanks to the powerful refrigeration unit that guarantees water that is always cold and in large quantities.

### INSTALLATION

The installation is very easy: just a simple connection to the water and electricity supply using the supplied kit.

Thanks to a 5 litre waste water tank, it does not need to be connected to the drain.

4 x Stainless steel refill point

Stainless steel top

Painted structure

4 x Double-positioned water dispensing buttons. Lower positioned buttons for people in wheelchairs and for kids

Space for 2 x 20 kg CO<sub>2</sub> cylinder, UV-led lamp and water connection

Space for AQA drink mineralization and filtration cartridge and accessories

330 l/h cooler inside

Standard color: white. Customization (on request) is quoted separately

# CITY STATIONS: OUR CONTRIBUTION FOR THE MUNICIPALITY

Already between 29 and 23 B.C. Vitruvius wrote in his treatise, "De Architectura", dedicated to Augustus, about the importance of water and having open springs: "water is especially necessary for life and daily use. It will be easier to find if there are open, flowing springs".

Still today, centuries later, BWT believes in this principle and pursues it with the design of the "City Stations" series of water dispensers for municipalities.

The cornerstone of this project is to help architects to design water dispensers for the city – from the renovation of existing spaces to "turn-key" municipality water dispensers – with BWT's exclusive and valuable mineralized water.

## WE HAVE A GOAL: WE WANT TO HELP ARCHITECTS TO PROVIDE THE CITY WITH LOCALLY PRODUCED MINERALIZED WATER

With the advent of plastic bottles, the digital age of online shopping and the frenetic pace behind which everyone seems to be rushing, we have lost the pleasure of a walk to the square, which has always been considered a meeting place par excellence.

People forget how much a single-use plastic bottle weighs on the environment in terms of CO<sub>2</sub> footprint and years spent on disposal.

The idea behind the AQA drink CITY STATIONS is to recreate places of aggregation and, above all, to offer the possibility of providing citizens with zero kilometre cold and sparkling water, mineralized with BWT technology, and to revalue disused areas.

The re-development of these areas allows for the creation of new spaces, often a reference point for socio-cultural and environmental initiatives.

More than **650**

CITY STATIONS\* have been realised in Italy by BWT in the last 10 years

\* AQA drink CITY STATION "turn-key" and custom-made versions

When you drink water, don't forget the source from which it flows.

Charles Dickens  
Writer, journalist and travel reporter

## SPECIAL TOPIC CITY STATIONS WITH SOLAR PANELS

Around 10 m<sup>2</sup> of solar panels are enough to make the city station autonomous (as far as electricity is concerned).

# 2 OPTIONS, SAME RESULT: SAFE WATER FOR CITIZENS

## OPTION 1: THE "TURN-KEY" WATER DISPENSERS

AQA drink CITY STATIONS are water dispensers assembled by BWT and transported to the site. The architect and the municipality have to prepare a stall and the utility arrivals (electricity, water arrival and drainage). AQA drink CITY STATIONS are installed by authorised BWT personnel... almost like a domestic water dispenser! Nothing could be easier! (See details about AQA drink CITY STATION on the next pages)

## OPTION 2: WORKING SIDE-BY-SIDE WITH ARCHITECTS

There are often spaces in the city that the mayor wants to convert into water dispensers for citizens. BWT helps the architect in the design of each individual facility, by supporting him to find and study the possible spaces and how best to fit the water dispenser into its surroundings. Once the custom-made structure has been prepared\*, BWT personnel will install the water treatment system that will provide zero-kilometre water, perfect and safe, for citizens!

\* The project and realisation of the custo-made structure / building is the responsibility of the customer, not of BWT

# CUSTOM-MADE CITY STATION IN 6 EASY STEPS!

The process to create the perfect custom-made water dispenser for public venues consists of 6 simple steps from the first customer request (usually a municipal architect), to the study - side by side - of the most suitable solution, to the final realisation.

## STEP 1: MUNICIPAL ARCHITECT GETS IN CONTACT WITH BWT

WHAT'S GOING ON...

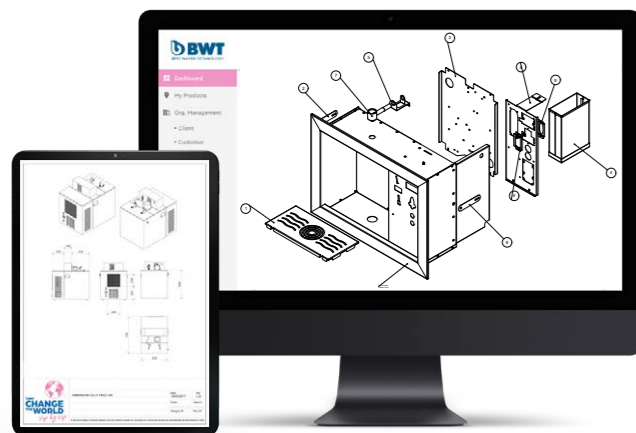

BWT's technical department carries out a small survey to determine the average number of people who will use the custom-made AQA drink CITY STATION. Thanks to BWT's experience, it's possible to direct the customer towards the most suitable water dispenser, for example with the right AQA drink COOLER or the right number of water refill points.

## STEP 2: WE SHARE INFORMATION ABOUT BWT'S PRODUCTS

WHAT'S GOING ON...

BWT's technical department gathers the relevant material: drawings with dimensions and data sheets of the AQA drink COOLER, the AQA drink mineralization and filtration solutions, the space for the CO2 cylinders (which are usually rented on site), information on the arrival and discharge of mains water, electricity, sanitisation system, etc., and shares it with the customer / architect.

## STEP 3: THE ARCHITECT DESIGNS THE STRUCTURE OF HIS DREAMS

WHAT'S GOING ON...

The customer / architect designs the custom-made structure\* and sends his design to BWT's technical department for final inspection.

## STEP 4: VERIFICATION OF THE PROJECT

WHAT'S GOING ON...

BWT's technical department verifies that the design of the custom-made CITY STATION meets the requirements of the flow scheme of the water treatment plant.

## STEP 5: WORKING ON THE STRUCTURE

WHAT'S GOING ON...

Once the customer receives the OK from BWT's technical department, construction work on the custom-built structure begins\*. When the structure is completed, the BWT service team installs the products according to the design of the technical department. Inside the custom-made structure the following is installed:

- Semi-automatic drinking water filter
- Automatic disinfection and sanitisation system
- AQA drink mineralizer cartridge
- AQA drink COOLER
- Control panel
- UV-LED lamps
- High-pressure armoured tube and CO2 cylinders (rented by the customer)
- Stainless steel dispensing point
- All the other accessories that complete the system (volumetric meters, EV, pressure reducer, etc.)

Finally we proceed with the testing of the complete system.

## STEP 6: THE CITY STATION CUSTOM-MADE IS COMPLETED

WHAT'S GOING ON...

Et voila! The water treatment plant within the custom-made structure is ready and tested.

At last, citizens, will be able to have in their park, neighbourhood, sports centre, square....everywhere... their mineralized, safe and zero-kilometre water.

\* The project and realisation of the custo-made structure / building is the responsibility of the customer

\* The project and realisation of the custo-made structure / building is the responsibility of the customer

# AQA drink CITY STATION

## THE CITY'S BEST-LOVED PUBLIC DISPENSER

The idea of public water houses is to recreate places of aggregation, offering the possibility to Municipalities to provide Citizens with refined water at a low price.

BWT AQA drink CITY STATION is a monobloc self-supporting monolithic structure, to be installed on proper base.

Inside, the structure is equipped with all the water treatment system to refine the drinking water from the mains water supply and provide the perfect cold and sparkling microfiltered and mineralized water.

The structure's paneling is painted with a powder coating that allows spray paint to be easily removed.

The entire structure is made of insulated metal carpentry.

The dispensing point is realized in inox aisi 316 with IP 68 vandal-proof buttons.

- Ideal for open public spaces
- Cold and sparkling water
- Capacity: 100 l/h (other models available on request)

This public dispenser is perfect for promoting the use of local water: waterworks provide controlled and safe water to citizens.

In fact citizens who use water from water houses often ask for a domestic water dispenser for their home.

It can dispense 2 types of water: cold and sparkling.

Inside the technical compartment there is also space for 2 × 20 kg CO<sub>2</sub> cylinders (to be rented on site).

- PCR CONTROL
- DISINFECTION AND SANITIZATION SYSTEM
- PAYMENT SYSTEM (NO SMARTPHONE)
- MONITOR WITH TOUCH SYSTEM

\* Connectivity via IoT technology

### DESIGN

AQA drink CITY STATION is made of insulated metal carpentry, painted with a special treatment that allows easy removal of paint can sprays.

A canopy allows the user to be covered when it rains.

Inside the structure the entire water treatment plant is installed and water is dispensed through a stainless steel dispenser.

There is also a drinking point on the side for small pets.

### TECHNICAL FEATURES

Inside the fountain there is a 100 l/h AQA drink COOLER with an ice bank system that guarantees cold water in large quantities. Thanks to BWT's technological choices, the AQA drink COOLER installed inside is one of the smallest products available on the market.

It is designed and manufactured with high quality materials to meet the highest standards of reliability and efficiency.

In addition to the refrigeration and carbonation system, an automatic sanitisation unit is included, such as the patented UV-LED lamps.

### INSTALLATION

In order to install the public water dispenser, it is necessary to set up a flat space with mains water, electricity and water drainage.

Standard color: white. Customization (on request) is quoted separately

# AQA drink POWER UNIT 480

CUSTOMISED PROJECT EXECUTION

## THIS IS A NEW WAY SUPPORTING EVENTS, AVOIDING SINGLE-USE BOTTLES AND CUPS

BWT AQA drink POWER UNIT 480 automatic water dispenser is a stand-alone system for treating and dispensing water. It can be applied in any part of the world. AQA drink POWER UNIT 480 is designed for water filtration at events and dispensing of water into reusable bottles.

The 4 dispensing zones are very conveniently located to fill the bottles of 4 consumers at same time.

The filtration system based on reverse osmosis allows you to get water with the same quality and taste in different places.

GSM on board controller included.

- Ideal for events and festivals
- Ambient, cold and sparkling water
- Capacity: 480 l/h

It's possible to combine BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

WATER DISPENSERS FOR YOUR HOME

# DOMESTIC UNIVERSE

*Our "Blue Planet" is increasingly becoming a "plastic planet".*

*Using a BWT water dispenser means using local tap water, filtering and mineralizing it to get best tasty, safe, hygienic drinking water.*

*Avoiding the purchase of water packaged in single-use plastic or glass bottles reduces waste production, as well as the environmental CO<sub>2</sub> impact caused by transport.*

*In this way, anyone can contribute to turning our "plastic planet" into a "Blue Planet"!*

*Anyone who drinks water directly from their tap gives an important contribution to our planet.*

**For You and Planet Blue.**

WATER FILTER TAP FOR YOUR KITCHEN

# AQA drink PURE @ HOME

## THE MODERN KITCHEN AID THAT'S AN ABSOLUTE PLEASURE

BWT has made it their business to make out of every water, the best drinking water. Available exactly where and when you need it. Undoubtedly, within a household, this is the kitchen. This is where a family meets, eats, drinks and chats.

What is the best ingredient for the most pleasurable drinking and cooking experience? For effective protection against limescale? For health and for the environment?

Quite simply, the answer is: BWT mineralized water.

Which now, thanks to BWT AQA drink PURE @ HOME, flows directly from your kitchen tap. The heart of the kit is in fact a 3-way tap (2 for hot and cold water + 1 for mineralized drinking water).

Simply open the tap from the filtered water lever and fill the glass with fresh mineralized water.

Our blue planet is unfortunately becoming more of a "Plastic Planet". Anyone who drinks water directly from a tap fitted with an AQA drink PURE @ HOME under-the-sink water filter gives an important contribution to the protection of our environment.

If we no longer buy water in single-use plastic or glass bottles – production, storage and environment polluting transport simply disappears.

And in the end we are also creating less waste.

AQA drink PURE @ HOME consists of a fixed part (.A) plus mineralization and filtration cartridge chosen by the user (.B).

The kit (.A) is made of:

- high-quality GROHE tap
- programmable AQA monitor with filter replacement indicator
- filter head for the BWT AQA drink filter

You have a choice (.B) – add the filter for you to go with the kit. You can choose your filter from the AQA drink filter portfolio to get mineralized water directly from your new tap.

Item n° – Kit	125560433
Style	C spout
Tap colour	Chrome
Material of construction	Metal
Assembly	Single-hole assembly
Swile spout	✓
Operation	Single lever + additional lever
Ø tap connector	Hose with 3/8" swivel nut
Power connection	No
Ø drill worktop mm	34
Tap height mm	411

### TECHNICAL FEATURES

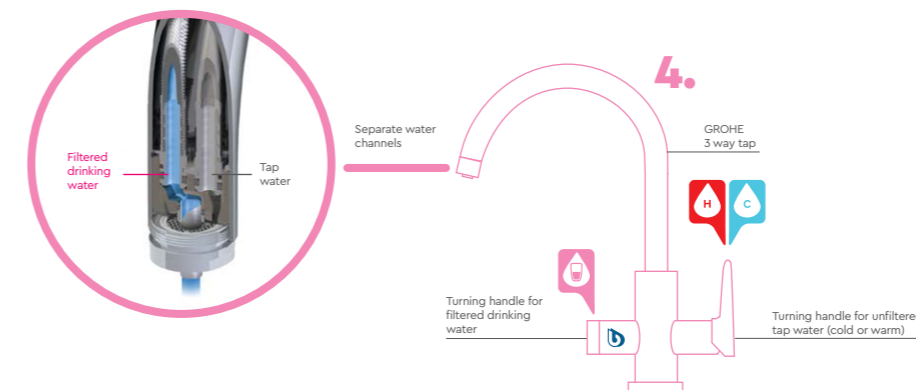

All AQA drink PURE @ HOME contain the AQA drink filter head. Depending on your drinking water requirements, you can choose an AQA drink filter.

### INSTALLATION

The filter is installed directly under the sink unit and is connected to the water pipe as well as the tap.

The tap has two levers: one for the mineralized, filtered water and one for unfiltered tap water.

A programmable counter unit monitors the filter capacity and signals the need to replace the filter. An acoustic signal indicates as soon as the filter needs to be changed.

### FLOW SCHEME

1. AQA drink filter cartridge\*
2. Filter head
3. AQA monitor
4. AQA drink PURE @ HOME tap

\*AQA drink filter cartridge is to be purchased separately. See next pages

THE EASY WAY TO ENJOY LOCALLY MINERALIZED DRINKING WATER ON DEMAND, DIRECTLY FROM THE LOCAL TAP!

# BWT MIXO

Thanks to the BWT innovation MIXO, there is an easy and cost-effective way to enjoy locally mineralized drinking water directly from the tap. Be flexible and fill mineralized drinking water on demand, locally-produced without replacing the existing water faucet.

## BWT MIXO CONSISTS OF 3 PARTS:

1. The integrated BWT MIXO Connector, which is simple to install under the sink. It connects ingoing raw water, the BWT Mineralization cartridge and the outgoing flow up to the existing faucet above the sink.
2. An intelligent waterproof BWT MIXO remote control, which is connected wireless. Very comfortable to be used anywhere nearby the sink, it is battery powered and allows inductive charging. Only one touch to switch between raw and mineralized water, indicated by LED flashlight, while receiving a haptic vibration feedback (all learned from the daily use of cell phones)
3. BWT Mineralized Water Cartridge

Item n°	125591198
Version	For a tap already installed
Water selection point	With remote control

## BWT APP

Furthermore, the BWT APP connects to the BWT MIXO. It can provide actual water consumption of filtered/not filtered water and reports the lifecycle of the Mineralization cartridge.

Convenient, premium water, cost effective and easy to install and apply.

Coming soon in 2023.

## THE SPACE-SAVING DISPENSER FOR YOUR HOME

AQA drink VERT 20 is the revolutionary water dispenser for cold and carbonated water. The small dimensions allow the dispenser to be easily positioned on any kitchen. AQA drink VERT 20 is the smart solution to protect the environment by reducing the use of single-use plastic bottles.

- Ideal for home
- Ambient, cold and sparkling water
- Capacity: 20 l/h

It must be connected to a 5-way mixer, thus avoiding the need to drill holes in kitchen top. Filter and cylinder are external to the machine 3,5 bar water pressure reducer included.

- **EASY INSTALLATION**
- **INSTALLATION UNDER THE SINK**

## DESIGN

Under counter water cooler, it can be installed in any kitchen thanks to its compact dimensions. Innovative for the cooling technology and inline carbonation. The casing is powder painted.

## TECHNICAL FEATURES

Filter and cylinder are external to the machine 3,5 bar water pressure reducer included. The flow rate per hour is up to 20 l/h, perfect for home. The water is dispensed via 3 or 5 way tap.

## INSTALLATION

Installation takes place under the kitchen: a simple connection to the water mains, electricity and it can be connected to a 5-way mixer (to be purchased separately), thus avoiding the need to drill holes in kitchen top using the supplied kit is all that is needed. Quick connections are positioned on top of the dispenser.

Easy installation with quick connections on top

\* Connectivity via B.Connect possible for devices up to 60 l/h

\*3 or 5 way tap must be purchased separately

# AQA drink FLAT 20

## THE SMART CLEVER SOLUTION FOR ANY HOME

AQA drink FLAT 20 is the revolutionary water dispenser ambient, cold and sparkling water. It was completed after technical researches of more than 12 months, the time required to find suitable components for the type of product, until now not available on international markets. AQA drink Flat 20 is patent pending. The main innovation is related to its extremely reduced dimensions and the technology used to cool and carbonate the water, by using a compressor.

- Ideal for homes with little space (height just 96 mm)
- Ambient, cold and sparkling water
- Capacity: 20 l/h

AQA drink FLAT 20 takes up incredibly little space, being available in the under-plinth version with a height of just 9,6 cm, thus occupying an unused area of the kitchen and freeing up other precious space in the under-sink. It must be connected to a 5-way mixer, thus avoiding the need to drill holes in kitchen top. Filter and cylinder are external to the machine 3,5 bar water pressure reducer included.

- EASY INSTALLATION
- INSTALLATION UNDER THE SINK
- HEIGHT: JUST 96 mm

## STILL, COLD OR SPARKLING WATER AT THE TOUCH OF A BUTTON

AQA drink 20 is the little brother of AQA drink PRO 20.

It's a countertop water dispenser available in 2 different colours, black and silver or white and silver. It provides a great-tasting mineralized water – ambient, cold or sparkling. AQA drink 20 is available as a countertop or as a floorstanding solution (with integrated base cabinet, available in both colours).

The special feature is its open condenser coil, located at the back, which allows for greater and easier heat exchange and thus the cooling of the cooler: small size but great cooling power due to its excellent design.

- Ideal for home, office and workplace
- Ambient, cold and sparkling water
- Capacity: 20 l/h

The dispenser comes with all accessories inside, its compact size and minimalist design make it easy to place in any kitchen.

AQA drink 20 is provided with a BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

- COUNTERTOP OR FREESTANDING UNIT
- AVAILABLE ELECTRONIC OR MECHANICAL VERSION
- EASY DISINFECTION WITH BWT EASYCARE SYSTEM

\* Connectivity via B.CONNECT possible for devices up to 60 l/h

### DESIGN

The BWT AQA drink 20 dispensers are characterised by a modern design: the white or black surfaces perfectly complement the silver-coloured ones, giving the dispenser an attractive look that fits into any kitchen or office. Thanks to their compact design and the possibility of having them in a countertop version (also with matching cabinet), they are easy and versatile to position.

### TECHNICAL FEATURES

The AQA drink 20 is small but powerful, efficient and reliable: the functionality is intuitive and three different types of water are dispensed via practical buttons. An open condenser coil is located at the back, which allows for greater and easier heat exchange and thus the cooling of the cooler. The cooling capacity is up to 20 l/h, perfect for offices and also for the home.

### INSTALLATION

The installation is very easy – all that is needed is a connection to the water and electricity supply using the supplied kit. No connection to the drain is required because all models have a matching drip tray that can be fitted with an additional container in the cabinet.

## STILL, COLD OR SPARKLING WATER IN SPACE-SAVING VERSION

AQA drink 20 U is the undercounter water dispenser, for those with space problems in the kitchen.

It's available in 2 versions:

- with electronic valves for 5-way or 3-way dedicated electronic tap in black colouring,
- mechanical version in white colouring, which can be installed with any mechanical 5-way tap available on the market.

It provides a great-tasting mineralized water - ambient, cold or sparkling. AQA drink 20 U is available with 2 taps (to be purchased separately): a 5-way tap or a dedicated to the water dispenser (to be added to the tap already installed in the kitchen).

The mechanical version allows you to choose any 5-way tap on the market.

The special feature is its open condenser coil, located at the back, which allows for greater and easier heat exchange and thus the cooling of the cooler: small size but great cooling power due to its excellent design.

- Ideal for home, office and workplace
- Ambient, cold and sparkling water
- Capacity: 20 l/h

### INSTALLATION

The installation is very easy - all that is needed is a connection to the water and electricity supply using the supplied kit. No connection to the drain is required. It requires the installation of a tap (available in two versions\*: 5-way or dedicated for the AQA drink 20 U, or, in the mechanical version, of the customer's choice).

\*The 3-way dedicated tap or 5 way tap are not included in the undercounter version and must be purchased separately

Electronical (black) + 5-way or 3-way dedicated tap with electronic connection for AQA drink 20

Mechanical (white) + any mechanical 5-way tap

# AQA drink 5-WAY SHOWER TAP

## 5-WAY SHOWER TAP FOR WATER DISPENSERS

This elegant 5-way tap with mixing lever and mechanical selector switch is the ideal companion for the AQA drink 20 U (mechanical version only).

Developed in collaboration with GUGLIELMI RUBINETTERIE, it's a semi-professional tap with modern and elegant lines, designed for everyday practicality, made from top quality materials.

There are two levers to operate the water supply:

- one for dispensing hot and cold mains water
- one with a mechanical selector for ambient, still and sparkling water from the water dispenser

Water is dispensed in separate channels for maximum comfort and hygiene.

Its special feature lies in the presence of two water dispensing points:

- one for mains water via its pull-out 2-jet metal hand shower with easy coupling (with ceramic cartridge for mains water guaranteeing a flow rate of up to 9 l/min)
- the other one for mineralized drinking water located on the hand shower support rod.

The AQA drink 5-WAY SHOWER TAP can be combined with all BWT undercounter water dispensers in mechanical version.

## DESIGNED TO MAKE LIFE EASIER

AQA drink HOME 25 is the latest generation water dispenser for the home and also for offices and the workplace: it is designed to make life easier for the end user.

It dispenses three different types of water: cold, sparkling and ambient.

Its special feature is the methacrylate front panel with sinuous rounded corners that can be easily removed with a simple click.

It provides access to where the filter and CO<sub>2</sub> cylinder are located.

It's designed to contain the BWT mineralizer and a small CO<sub>2</sub> cylinder (425 g or 640 g refillable, 600 g disposable) directly inside.

It features blue backlit buttons on the front panel.

- Ideal for home, office and workplace
- Ambient, cold and sparkling water
- Capacity: 25 l/h

The dispenser comes with all accessories inside, its compact size and minimalist design make it easy to place in any kitchen.

AQA drink HOME 25 is provided with a BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

- EASY INSTALLATION
- UV-LED TECHNOLOGY\* (OPTIONAL)
- 3,5 BAR WATER PRESSURE REDUCER INCLUDED
- AVAILABLE WITH 2 OR 3 PUSH BUTTONS
- PATENTED ICERMETIC3 CARBONATION TECHNOLOGY

\* UV-LED technology - optional  
 \*\* Connectivity via B.Connect possible for devices up to 60 l/h

## DESIGN

This water dispenser is characterised by a modern design: the white or black glossy surfaces match perfectly into any environment. The casing is powder painted. The grate has BWT logo.

## TECHNICAL FEATURES

The AQA drink HOME 25 is provided with the patented Icermetic 3 cooling technology and a 2,5 l stainless steel carbonator with a double coil for cold water.

The flow rate per hour is up to 25 l/h, perfect for homes.

## INSTALLATION

The installation and maintenance are very simple, especially for operations such as filter and CO<sub>2</sub> cylinder replacement, which can be carried out directly by the customer.

All that is needed is a simple connection to the water and electricity supply using the supplied kit.

No connection to the drain is required because all models have a matching drip tray.

Available total black or total white

## DELUXE SOLUTION FOR MODERN, TRENDY KITCHENS

BWT AQA drink CUISINE 25 is the built-in model for dispensing 3 types of water, ideal for built-in installation in a standard kitchen module of 600×500 mm.

The unit slides on rails for easy access to its interior, which is designed to contain both the BWT filter and the CO<sub>2</sub> cylinder (425 g and 640 g refillable; 600 g disposable) on the side.

- Ideal for home, office and workplace
- Ambient, cold and sparkling water
- Capacity: 25 l/h

To make it adaptable to all kitchens and cabinet doors, AQA drink CUISINE 25 is available with the front panel in 2 different versions: white or black.

AQA drink CUISINE 25 is provided with BWT's AQA drink mineralization and filtration solutions, so that you have valuable water rich in valuable minerals. In addition, periodic disinfection and cleaning can be performed using BWT's EasyCare system.

- FOR LUXURY KITCHENS
- UV-LED TECHNOLOGY (OPTIONAL)
- PATENTED ICERMETIC3 CARBONATION TECHNOLOGY
- 3,5 BAR WATER PRESSURE REDUCER INCLUDED

\* UV-LED technology – optional  
 \*\* Connectivity via B.Connect possible for devices up to 60 l/h

## DESIGN

The front panel is made of a nice combination of stainless steel and methacrylate that suits all types of kitchens, matching the other appliances.

These materials are coupled using an innovative technology that guarantees a particularly brilliant colour, guaranteed for over 20 years against UV radiation.

## TECHNICAL FEATURES

The AQA drink CUISINE 25 is provided with the patented Icermetic 3 cooling technology and a 2,5 l stainless steel carbonator with a double coil for cold water.

The flow rate per hour is up to 25 l/h, perfect for homes.

## INSTALLATION

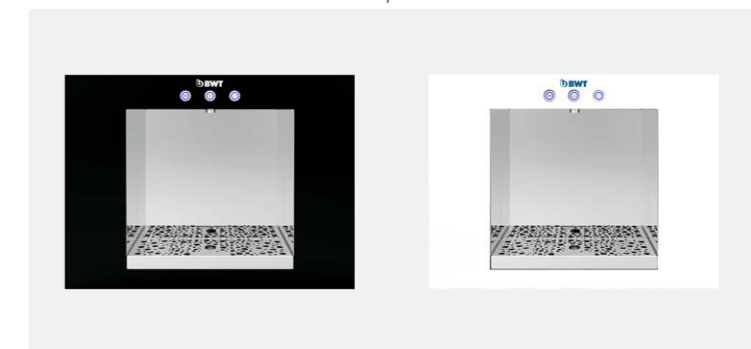

The installation requires a built-in kitchen module with standard dimensions of 600×500 mm.

No connection to the drain is required because all models have a matching drip tray.

MINERALIZATION FOR WATER DISPENSERS  
AND HOME

# MINERALIZATION & FILTRATION

*All BWT AQA drink filters refine your tap water in five filtration stages. During this process, particles, heavy metals (such as copper, lead and nickel), odor and other taste disturbing substances such as chlorine are reduced. This state of the art filtration is just the preparation phase. The real difference uses the patented BWT mineralization technology with solid filtration technology.*

*That's BWT water enhancement "inspired by nature". Local, filtered tap water, enriched by valuable minerals such as magnesium, zinc and silicate deliver perfect taste and help to feel more balanced and resilient to stress.*

*This allows people worldwide, wherever they are, to stop using single-use plastic bottles, saving the transport, storage and disposal of this unnecessary plastic waste. As long transport of bottled water is not necessary, there is a significant positive impact towards lower CO<sub>2</sub> emissions.*

*Without compromise, because BWT makes tasty, locally-produced mineralized drinking water.*

**For You and Planet Blue.**

# CHANGE THE WORLD, SIP BY SIP

**DRINK RESPONSIBLY FOR YOU AND PLANET BLUE.**

**THE BWT FILTER REUSE PROJECT**

With BWT's 'Filter Reuse Project', plastic waste is further reduced. Exhausted filter cartridges can be returned to BWT. BWT is able to use at least 99% of the filter cartridge materials for reuse in different products.

All in the spirit of **For You and Planet Blue.**

**THE PROCESS  
WHAT HAPPENS TO  
THE USED FILTER  
CARTRIDGES?**

In a first step, the filter casing is separated from the ion exchange resin in the used filter cartridge. This is carried out in a "cutting cartridge station" which has been developed at the BWT production facility in Mondsee, Austria. The separate components are then collected and processed, including the ion exchange resin, a portion of which is used to produce new cartridges. The plastic is processed into granulate and reused to produce recycled plastic products – e.g. plastic sheeting, waste bins, garden chairs, etc. The recycled plastic is then reused – only the mesh actually ends up in the residual waste!

**RECYCLING: DON'T REFUSE TO REUSE!**

*We launched a sustainability offensive in our filter cartridge sector some time ago that analysed both the demands of the trade and our partners. Because it is now crucial for retailers to demonstrate the transparency of the recycling data of their various manufacturers and the contribution they are making to protect the environment.*

Our recycling process shows our vision of how the responsible use of the available resources works in practice, and the contribution we make to environmental protection. Our efforts are impressive: BWT has implemented optimal processes ranging from waste reduction and the processing of valuable resources to the conservation of raw materials.

A great process is realised in the filter technology sector, where the core element is the filter cartridges. These are a true source of raw materials and we integrate them into a circular economy using optimal procedures.

Up to 99 % of the materials in a cartridge can be reused. Early this year and after an intensive planning and conception phase, we sent a team out to film the filter cartridge recycling process that illustrates this recycling process based on the Cradle to Cradle certification for specialist retailers.

*Up to 99% of materials can be reused*

DISINFECTION AND CLEANING BY BWT

# DISINFECTION & CLEANING

*The importance of device cleaning! To ensure optimal operation and the best possible water quality, correct, regular and professional cleaning and disinfection of water dispenser systems is required.*

*This prevents contamination and inhibits bacterial growth in the device. Use BWT EasyCare every time you change filters for even more hygiene and safety in your system.*

**For You and Planet Blue.**

# BWT EASYCARE

## HYGIENIC, SAFETY & CLEANING SYSTEM, SIMPLE AND SAFE!

The new and highly effective BWT EasyCare cleaning system, regularly used, supports your water dispenser system and keeps it hygienically safe.

It is ready to use, safe and unique and there is no comparable alternative on the market.

Due to the easy-to-use disinfection programme, the operators can disinfect the system and the water dispensers by themselves.

A service technician is therefore not required.

- The system consists of:
  - BWT EasyCare Adapter
  - BWT EasyCare Tab
- Necessary system interface:
  - BWT filter head (already installed in the system)
- **ECO-FRIENDLY**
- **FITS ALL BWT FILTER HEADS**
- **READY-TO-USE**
- **PROGRAMME AIDED DISINFECTION FOR AQA drink PRO 60 / AQA drink PRO 20**

Item n° - Adapter	125297204
Item n° - TAB single	125297205
Nominal flow rate l/h	120
Flow deviation l/h	+ / - 30
Operating pressure (min./max.)	2 / 8 bar
Water inlet temperature (min./max.)	+4 °C to +30 °C
Ambient temperature (min./max.)	+4 °C to +40 °C

EASYCARE IS

### SIMPLE

The ready-to-use BWT EasyCare Tab and the BWT EasyCare Adapter clean and disinfect easily and efficiently

EASYCARE IS

### VERSATILE

The BWT EasyCare Adapter fits all BWT filter heads

EASYCARE IS

### SAFE

The cleaning tablet is already installed in the BWT EasyCare Tab, which prevents direct contact. The BWT EasyCare Adapter is self-sealing

EASYCARE IS

### EFFECTIVE

Your device is cleaned and disinfected efficiently for more hygiene and safety

EASYCARE IS

### ECO-FRIENDLY

The BWT EasyCare Adapter is used over and over again, only the BWT EasyCare Tab has to be disposed of. This means that almost no waste is generated

BWT filter head\* installed in all systems, programmed for BWT EasyCare

BWT EasyCare Tab insert with integrated cleaning tablet. Necessary for each cleaning cycle

BWT EasyCare Adapter serves as an easy and secure connection for the BWT EasyCare system

\* BWT filter head is not included in the kit

CLIMATE BOTTLES, GASSES AND CARAFES  
FOR YOUR TABLE

# ACCESSORIES BY BWT

*Enjoying best drinking water experience with your eye. Get inspired from the broad collection of carafes, bottles, and glasses.*

*In this way, single-use plastic, long transport routes (even in glass bottles) and harmful CO<sub>2</sub> emissions are reduced, and valuable resources are sustainably conserved.*

**For You and Planet Blue.**

# THE MOST ELEGANT WAY TO ENJOY YOUR TASTY, MINERALIZED WATER

Mineralized water, teas and juices: nothing beats BWT's reusable bottles to serve on the table or to take them with you at all times, keeping the drinks freshness and flavour.

There is no doubt that sipping a cool drink during the warmer seasons is one of life's little luxuries.

But while preparing your favourite drinks takes only a few minutes – at the push of a button on a BWT water dispenser – enjoying them should be done in complete relaxation, savouring every drop!

Choosing the right way to enjoy and store your drinks is a surprisingly important aspect.

Bring your locally treated mineralized water to the workplace, restaurants or events. With the BWT Climate Bottles you always have perfect water at the right temperature, hot or cold.

THE SUSTAINABLE AND  
CONVENIENT TOOL TO ENJOY  
BEST BWT MINERALIZED WATER

## THE BWT CLIMATE BOTTLE

BWT Climate Bottle is the thermal water bottle that keeps your drinks hot and cold for hours, lightweight and versatile for all your needs. Condensation-free and space-saving, it is designed to follow you on every adventure.

You can carry it everywhere you go, it fits into any cup holder and backpack.

With the double-wall stainless steel, it keeps drinks cold and hot for up to 6 hours – perfect for all 4 seasons.

With the BWT Climate Bottle you are contributing to reducing plastic waste, avoiding long transportation, and minimizing the CO<sub>2</sub> footprint. It is unbreakable and taste-neutral.

**Drink locally produced mineralized water and join our mission!**

### BWT CLIMATE BOTTLES

Item n°: 125549183 Pink

Item n°: 125549181P White

- Weight: 291 g, size: 71 x 260 mm
- Personalization possible in 4 different fonts and sizes

PERFECT FOR ALL 4 SEASONS

DURABLE FINISHING

SUITABLE FOR ANY TYPE OF BEVERAGE

DOES NOT ABSORB OR IMPART FLAVOUR

## BWT STANDARD GLASS CARAFE

**Item n°: 825316**

With this stylish glass carafe, you will enhance any table, whether at home, in meeting rooms or in the office. The large opening makes it easy and convenient to fill, even with ice cubes or fruit and herbs. The shape of the carafe makes it pleasant and comfortable to touch and the shapely lid with 360° spout allows glasses to be filled unerringly. In addition, the glass carafe is mouth-blown and framed by a silicone rim. The included AQA tags in white (sparkling) and pink (still) can simply be clipped onto the lid and indicate whether the carafe contains still or sparkling water. From now on, guesswork and shaking are a thing of the past.

- High-quality glass carafe: High-quality, mouth-blown glass carafe 1,1 l with silicone rim and shapely lid with 360° spout
- Convenient design: For cooling, the carafe can be placed in a drinks compartment of a standard refrigerator
- Easy identification: AQA tags in white and pink to identify still and sparkling water

## BWT "CTWSBS" GLASS BOTTLE

**Item n°: 153222 (black cap)**

**Item n°: 153223 (silver cap) set of 12 bottles**

With this elegant glass bottle, you will enhance any table.

The shape of the bottle, with the 'Change the World, sip by sip' logo, makes it pleasant and comfortable to the touch.

The narrow spout allows glasses to be filled infallibly. From now on, guesswork and fussing will be a thing of the past.

- High-quality glass bottle: High-quality 0,75 l glass bottle with engraved logo and narrow spout
- Practical design: For cooling, the bottle can be placed in the drinks compartment of a standard refrigerator
- The claim is clearly engraved: Take your step and 'Change the World, sip by sip'!

## BWT "FILL ME" GLASS BOTTLE

**Item n°: 153084**

With this glass bottle, you will enhance any table.

The shape of the bottle, with the 'Change the World, sip by sip' logo, makes it pleasant and comfortable to the touch.

The narrow spout allows glasses to be filled infallibly. the practical lever cap allows the bottle to be closed quickly.

From now on, guesswork and fussing will be a thing of the past.

- High-quality glass bottle: High-quality 0,6 l glass bottle with engraved logo and narrow spout, with practical lever cap
- Practical design: For cooling, the bottle can be placed in the drinks compartment of a standard refrigerator
- The claim is clearly engraved: Take your step and 'Change the World, sip by sip'!

## BWT BASIC GLASS CARAFE

**Item n°: 147131 = 0,75 l**

**Item n°: 147132 = 1 l**

This robust and elegant carafe is a true classic of the table.

Perfect for all kinds of venues, from restaurants to bars.

The design, sober and essential, adapts to the most diverse types of mise en place. Beauty and functionality are guaranteed by the material it is made of, glass, which in addition to being exceptionally transparent and brilliant, does not alter the visual and olfactory perceptions of drinks.

- High-quality glass bottle: 0,75 or 1,0 l high-quality glass bottle with practical flip-top cap
- For cooling, the bottle can be placed in the drinks compartment of a standard refrigerator

## BWT YPSILON GLASS CARAFE

**Item n°: 142725**

This robust carafe with an essential design is perfect for all types of bars.

The sober and essential design does not alter the visual and olfactory perception of drinks. The wide spout is ideal if you want to fill the carafe with ice cubes.

- High-quality glass carafe: high-quality 0,55 l glass carafe
- For cooling, the bottle can be placed in the drinks compartment of a standard refrigerator
- Large beverage mouthpiece

## BWT FUN GLASS BOTTLE

**Item n°: 143071**

Robust bottle with an essential design. Its shape echoes the lines of those used in the past, with a curved base and a narrowing at the top. They are made from state-of-the-art materials and with an eye for functionality, thanks in part to their lever cap.

- 0,70 l glass bottle
- For cooling, the bottle can be placed in the drinks compartment of a standard refrigerator

## BWT DRINKING GLASS (SET OF 6 GLASSES)

Item n°: 125252403

The high-quality drinking glass perfectly complements the BWT glass carafe and embellishes every table. Whether they are filled with water or other drinks: the BWT glasses are suitable for use at the restaurant, at elegant parties as well as at home for everyday life. GUIDE TO CHOOSING THE PERFECT  
WATER DISPENSER

# MASTER OF WATER DISPENSERS

*Water is the elixir of life and at the same time a limited resource. But there are technologies – such as those used by BWT in the design of its water dispensers – that allow you to have an inexhaustible source of safe drinking water at the right temperature, ambient, cold or sparkling. This Master will make it easy for you to choose the water dispenser that best meets your needs.*

**For You and Planet Blue.**

# CHOOSING THE PERFECT BEST MINERALIZED WATER DISPENSER HAS **NEVER BEEN EASIER!**

Our mission 'Change the World – sip by sip' clearly demonstrate our great efforts to reduce the world's growing mountain of plastic waste and to also ensure access to clean, healthy drinking water.

Water dispensers are one of the main pillars of this movement, where consumers can fill up reusable bottles with fresh, tasty, mineralized drinking water and thus avoid using single-use, plastic or glass bottles.

Thanks to its production flexibility, BWT offers a wide range of water dispensers and reverse osmosis, unique in their completeness and performance, with models differing in function, technology and usage environments.

To make your life easier, we provide you with a master for choosing the perfect water dispenser, recommending the product according to the number of people and the intended use.

OUR HELP FOR THE FUTURE OF THE  
PLANET BLUE

# B. WaterMISSION

SPONSORED BY  
**BWT**

*b. WaterMISSION is a project to promote sustainable access to water in Africa. Together, sip by sip, we can make the world a better place.*

**For You and Planet Blue.**

# OUR CONTRIBUTION TO A SUSTAINABLE FUTURE OF OUR PLANET BLUE

For You and Planet Blue – this brand message is more relevant today than ever before. With our project b.WaterMISSION we want to contribute to improving the lives of the world's poorest people.

## "FOR YOU" BWT ASSUMES RESPONSIBILITY FOR THE SOCIETY AND FUTURE GENERATIONS

This is an important part of our corporate philosophy and also our definition of responsible entrepreneurship.

We want to help people who are struggling – providing assistance has always come naturally to us, and we have intensified these activities even more in recent years.

The main target of our b.WaterMISSION is to support sustainable access to clean drinking water in Africa.

## SUSTAINABLE WATER SYSTEMS: WITH ANY DONATION YOU CAN MAKE A DIFFERENCE

The b.WaterMISSION is a project of AQUA PEARLS Charitable Foundation\*. We have set ourselves the goal of building wells in mainly rural areas of Gambia and Tanzania, thereby ensuring the access to clean drinking water. The functionality of the taps is safeguarded via permanent online monitoring, which sets the basis for the sustainable and reliable implementation. Now it is our (joint) task to build as many taps as possible.

Every installed water tap brings us closer to our goal: Change the World – sip by sip!

With these activities, BWT emphasizes that the brand claim "For You and Planet Blue" is a reality and that it is doing its utmost to make a sustainable contribution to the environment and sustainability, as well as in terms of Corporate Social Responsibility (CSR). If you would also like to support this project, you can find out more at [bwt.com/csr](https://bwt.com/csr)

**50%** of the world's population will be living in regions with water shortages by 2050.  
Source: <https://www.unicef.org/wash/water-scarcity>  
As at 01.2.2023

## HOW IT WORKS

The b.waterMISSION tap is an intelligent water dispenser which ensures, that the operation is technically monitored. All income can be tracked, controlled, and used transparently by private organizations or authorities to be able to pay for the ongoing maintenance of the systems.

"Before the tap was only open from 9am to 12pm and in the evening from 5pm to 6pm. It was so difficult for us, honestly. It's so perfect now, because anytime you need water you can get it, even at midnight."

Asanatu Mballow  
Female Villager, Jarreng

## Our targets with the building of taps in Africa: creating awareness, that water – the elixir of life – is of VALUE

Ensuring sustainable operation via online monitoring and on-site maintenance:

1. Construction of several thousand taps in the next few years
2. Access to safe and clean drinking water
3. Ensuring, that nobody has to walk further than 150 m to the next tapping point

To the online monitoring of our taps
