

MAGNESIUM MINERALIZED WATER

MY WATER CAN DO MORE

For You and Planet Blue.

BRING QUALITY INTO YOUR LIFE WITH **BWT** **MAGNESIUM MINERALIZED WATER**

DRINKING SUFFICIENT QUANTITIES OF WATER
IS IMPORTANT FOR A HEALTHY BODY AND
YOUR PERSONAL WELL-BEING

My taste experience

Using natural minerals for the best aroma

The addition of magnesium keeps the mineral level of water in balance. The result is an almost neutral pH value that connoisseurs of water appreciate for its delicious taste and softness. Turn your tap water into a unique taste experience. Perfect on its own, as a mixer or as a flavour carrier in tea and coffee.

More convenience

Relaxed through the day

The BWT products offer a convenient boost for your body with healthy and vitalising drinking water. Maintaining your magnesium balance simply and effectively.

Maximum availability

Magnesium mineralized water however you need it

Whether at home, school or work the AQA drink range and the Magnesium Mineralizer is available in refillable bottles or can convert your tap water into the most tasty and pleasant drinking water directly at source.

Your advantage

For your well-being

Magnesium strengthens your immune defences and is important for your nervous system, thus ensuring reduced stress and a more restful sleep. Having a sufficient quantity of magnesium in your body also boosts your physical and mental performance.

Do good

Live consciously for the environment

By using a BWT water dispenser or table water filter, you are not only sparing the environment enormous amounts of single use plastic bottles, but also their transportation and disposal. This is easy on your wallet, but also on the environment.

Costs

A smart decision

BWT products are in a class of their own from a quality perspective, but also economy. A litre of magnesium mineralized water costs significantly less than the corresponding amount of single use bottled mineral water.

Added performance and concentration

GET OFF TO A FLYING START

Whether at school, at university or at work:

A sufficient supply of drinking water is important for your body, and your general well-being. Magnesium vitalises, promotes concentration and provides a natural energy boost. With BWT products, you are ensuring a constant supply of fresh, clean drinking water in your environment.

Let the show begin

A POWERFUL PERFORMANCE

Magnesium mineralized water for your customers and visitors:

Refreshing drinking water is essential for your staff and customers. Thanks to the simple functionality, you can enjoy clean, delicious drinking water wherever and whenever you want it effortlessly.

WE REFINE YOUR DRINKING WATER

Best Water Technology

For BWT, this is not just our name, but rather a promise to our customers and, not least, to the environment. Crystal clear drinking water is the greatest asset that our planet has to offer.

BWT is dedicated to the improvement of water wherever we find it, removing undesirable elements and at the same time increasing its mineral content.

At the heart of the process is our unique and patented BWT Magnesium Technology. Your drinking water is refined through five filtration levels into magnesium mineralized water*. During this process we remove heavy metals, the substances that produce limescale and the elements that impair its taste and smell. We also enrich the water with essential magnesium to maintain a balance of mineral content and a practical neutral pH value.

The results are impressive: an unforgettably refreshing water for your drinking enjoyment every single day.

*Five stage filtration process applicable to plumbed in systems only

The heart of our Magnesium Technology

Multiple water filtration:
Multiple water filtration turns your tap water into magnesium mineralized water.

THE PATENTED TECHNOLOGY FOR THE PERFECT TASTE

- 1 PRELIMINARY FILTRATION**
 - For particles, e.g. sand, rust
- 2 ACTIVE-CARBON PRELIMINARY FILTER**
 - For protecting the ion exchanger
 - Removal of heavy metals
- 3 ION EXCHANGE SOFTENING**
 - Removing the substances that cause limescale
 - Remineralization
 - pH balancing
- 4 ACTIVE-CARBON FILTRATION**
 - Removing substances impairing taste and smell, such as chlorine
- 5 FINE FILTRATION**
 - Collects even the finest particles

DISPENSES HOT, AMBIENT AND CHILLED WATER

BRIEF DESCRIPTION

The AQA drink 15 is a **modern and versatile** water cooler, its clean lines, touch button programming, **easy to use** controls and three water options (Hot, cold and ambient) make it ideally suited to reception areas and offices, busy workshops and even the home.

These attractive and durable water dispensers can be supplied as either bottle fed or plumbed in units. The bottled water model utilizes reusable bottles of our **Magnesium Mineralized Water** and so can be located where they are needed. The plumbed in model uses BWT's unique and patented Magnesium Mineralizer Technology to turn ordinary water into an enjoyable taste experience.

Water that can be enjoyed straight from the glass, mixed with your favourite cordials or combined to make hot drinks bursting with flavour.

PROVEN QUALITY:

COOLING TECHNOLOGY

Dry Cooling

A fully sealed unit combines water coils made of stainless steel and refrigerant gas coils made of copper into a single die cast aluminium block. The result is exceptional cooling performance delivering the highest capacity and performance in the range.

Models applicable: AQA60

Ice Bank

A natural choice for coolers in busy areas, it works by creating and maintaining a solid block of ice within a water bath. This type of system enables a consistent low dispensing temperature to be maintained even at peak times.

Models applicable: AQA40, AQA15

Fluid Cooling

Fluid cooling uses a large insulated reservoir to store and chill the water. As water is drawn off it is automatically replenished either from a bottle or the mains. The simplicity and reliability of system makes it Idea for low pressure and medium use applications.

Models applicable: AQA20

AUTO STERILIZATION

UV Out

Effective against bacteria, viruses, yeast and fungi, short wave UVC light irradiates the internal tap area sterilizing it 24/7.

Models applicable: AQA60, AQA40

Ozonation

Effective against bacteria, virus, yeast and fungi, ozone is dispensed at 4 hourly intervals sterilizing the internal pipework and surfaces of the cooler. Once exhausted the ozone breaks down into pure oxygen leaving no trace.

Models applicable: AQA15

Sanitization Packages

A certified BWT Engineer will physically clean all accessible areas of the cooler and replace any filters required. Then using a portable ozone generator we will sterilize the internal pipework and surfaces of the cooler to B.W.C.A. specification. Once exhausted the ozone breaks down into pure oxygen leaving no trace, unlike traditional chemicals

Models applicable: available for all models
